Subject: RE: Recommended Updates for Form 861 Annual Report Schedule 6

Good morning Aaron,

Thank you for your recommendations. EIA has limited flexibility to accommodate additional changes to the surveys beyond what we have proposed. We will consider your recommendations in a future clearance cycle.

Best,

Sara

Subject: [EXTERNAL] Recommended Updates for Form 861 Annual Report Schedule 6

Good morning,

For the past two years I have left comments on Groton Utilities 861 Annual submittal pertaining to Schedule 6.

MWh savings may not be an appropriate metric today. Most of our efficiency programs result in MW and MWh load growth, such as Heat Pumps and Electric Vehicles. And other programs aren't able to track a MW and/or MWh impacts such as Insulation programs, as those programs are fuel blind.

I would like to see the industry shift to either a MMBTU metric or better yet a carbon reduction metric such as CO2 savings.

Very Respectfully,

Aaron Brooks
