My comment on the proposed re-design of the Form 1023-EZ is:

Please do not allow this form to be used for nonprofit entities who intend to operate primarily outside of the U.S. I would worry that those who have obligations owing to the IRS or other U.S. debtors, can then easily use the nonprofit as a channel to get money to themselves outside of the U.S. with very little scrutiny, not to mention that the funds could be used for terrorist or other undesirable activities also with very little scrutiny.

Thank you.
Carol Davis
