Any IRS oversight of 501(c)(3) organizations must be equally enforced against religious organizations.

There should be absolutely no difference between a religious non-profit or a secular non-profit. There are many instances of fraud in
the mega churches that utilize faith as the tool to separate people from their money. Many of them not able to afford what they give.

It is too easy for anyone to set up a church, and receive donations that are not subject to scrutiny. There are almost no rules
governing the establishment of a church, which can then start asking for donations. Many people have utilized this ploy
for tax evasion.

Our government and country are secular. There should be no favoritism for religion.
