General Comment

the agency attitude is very cavalier about experimental populations of animals. they seem to not care about them individually at al. that is not in anyh way connected with the american people who care about individual lives of these animal populations. such a cavalier attitude leads to such experimetns with american tax dollars being wasted. there should never b e any hunting or trapping of any animal that is in an experimental population effort with american tax dollars. to alllow such things is a total rip off of the american taxpayer/citi8zens. we have an agency we are paying tax dollars to that has a disgsuting attitude to animals. it doesnt like them at all. it is all under usda and faremres who want to kill every animal on earth. we need to make sure we stop this from happening. the wildlife is here and we need to share earth, not decimate every other living thing on this planet. we need to start fresh. the pressent agency is deficient, morose, negligent and uncaring so that the animals get a raw deal from usfws. this agency in charge of animals hates wildlife. this agency only hires hunters and trappers who can kill and love to kill wildlfie. we need a sea change in the agency itself immediately,. this commetn is for thepublic record. this agency gets a n f minus for its work or a zero. this agency is focused on MONEY
