In Reference to this change: This petition should be denied based on the fact the information being collected speaks to background checks that help to safeguard our citizenry from threats of a foreign nature. Asking pertinent background information, no matter how potentially embarrassing such information may be is only prudent and speaks to the character of the petitioner. If a petitioner is worried about this add an explanation section in which the information can be explained thus allowing for a case-by-case review, to make a determination on the permeance status.
