Subject: public comment on federal register of 11/21/06 vol 71 pg 67326

fed reg doc e6 19667 - omb 0648-0214 pacific island family of forms for fishermen to fill out as to condition of stocks, etc.

going to the profiteers to get your information is a clear way to get misinformation based on what the profiteers want to tell you. i very much oppose any federal agency taking information directly from the profiteers who are raping and raiding the oceans that they alone profit from.

our children's heritage is being stolen by these very same profiteers, who will tell you what they want you to hear. the stocks are being made extinct, one by one by one. what kind of garbage information will you get from profiteers - certainly not the truth.

the law of the commons exists with these commercial fish profiteers and they are in fact decimating stocks.

take your information from somewhere else where you can get reliable factual information and not from the profiteers themselves. what is going on now is a sin.
