## General Comment

I am a former uranium miner with Denison Mining at the La Sal incline in La Sal Utah I know the radon sampling was faked and have sent proof of this to Ken Valintine the area manager about 1.5 years ago and nothing has been done since. If MSHA won,t look into current violations what is the use of having safety regulations. MSHA own records show that since this mine opened it had a long term pattern of citations for to high levels of radon, MSHA did nothing to address this knowing and will full action by Denisons. Why spend tax dollars on MSHA if they don't do there job. Matthew Bane

On a global level:

Occupational health assessment:

a thorough evaluation of local facility compliance against local and international standards  
Occupational health examines risks from the workplace and considers the work performed, employee demographics, underlying employee health, the work environment, facility setup and ergonomics.

Our wholly owned clinics operate in countries where medical care of an international standard is unavailable, or where cultural and language barriers make it difficult to receive appropriate care. Each clinic offers primary care, diagnostic care and 24/7 emergency care.

dear Therese de Saint Phalle

The Registry is the permanent administrative organ of the Court  
advisory opinions and orders of the Court

Advisory Jurisdiction

Since States alone have capacity to appear before the Court, public  
(governmental) international organizations cannot as such be parties to any  
case before it. A special procedure, the advisory procedure, is, however,  
available to such organizations and to them alone.
