**We would appreciate your participation!**

The U.S. Census Bureau, the University of Minnesota, the U.S. Department of Health and Human Services, and the Medica Research Institute are studying how well the Census Bureau measures health insurance coverage in national surveys. Medica is inviting you to be a part of this study because you have had health insurance recently.

These surveys are used to help make important policy decisions across the country.

**What you need to know**

You will get a call from the Census staff in a few months and be asked to take part in a brief, voluntary survey. The survey takes about 15 minutes.

**No action is necessary from you at this time.**

However, if you, or any other Medica member in your household, prefer **not** to receive a phone call from a Census staff member, call 866-342-4348 by January 15, 2015, and your household will be removed from the contact list.

Thank you and we hope you decide to be a part of this study.  
Sincerely,

A handwritten signature in black ink, appearing to read "D = a. Trajano".

Daniel Trajano, MD, MBA

Vice President and Medical Director for Population Health, Medica

**Your privacy is important**

**All your information will be private whether or not you are part of the study.** The study will **not** look at your medical records. When the Census staff member calls, you'll learn more about how they guard your privacy.

If you have any questions about the study, you can call 866-342-4348. If you want to talk to someone other than the study team, you can contact the University of Minnesota Research Subjects' Advocate Line at 866-508-6961.
