Subject: Question on Proposed Change for 14(c) Application

Question? For a worker with a disability in a Workshop setting, that does more than one job and the job he/she works on the most, he/she is paid minimum wage or higher, but other piece rated jobs they do are at below the minimum wage rate (\$7.25 an hour), I believe I should still list this individual on the new WH226 form and use the job they do not work on the most. Is this correct?
