

The Natural Gas STAR Program is a

flexible, non-regulatory partnership between EPA and the oil and natural gas industry aimed at demonstrating the costeffectiveness and environmental benefits of methane emission reduction opportunities.

The recommended Natural Gas STAR Best Management Practices (BMPs) for Distribution Companies have been jointly identified by EPA and the industry as cost -effective options for reducing methane emissions.

Partner Reported Opportunities (PROs) are additional methane emission reduction options reported by partner companies. PROs can reduce gas loss, increase profits and improve operational efficiency.

Best Management Practices

- Implement directed inspection and maintenance programs at gate station, and surface facilities.
- Identify and rehabilitate leaky distribution pipe.

Partner Reported Opportunities

 Identify and implement other costeffective methane emission reduction management practices and technologies.

EPA's Responsibilities

- 1. Assign a STAR Service Representative responsible for assisting the partner in implementing the Program.
- 2. Assist partners with Program implementation by: (1) analyzing emerging technologies and practices; (2) developing workshops and training courses; and (3) assisting in the removal of regulatory barriers to implementing Program BMPs, when appropriate.
- 3. Provide partners with public recognition for their commitment to the Program through advertisements, press releases, articles, and
- 4. Recognize partners for methane emission reductions achieved before joining the Program, back to 1993.

Natural Gas STAR Partner's Responsibilities

- Appoint a company representative as the Natural Gas STAR Program Implementation Manager responsible for implementing this
 voluntary agreement.
- Submit an implementation plan within six months of signing this agreement outlining expected activities and scope of implementation.
- Implement, within three years, applicable BMPs and PROs at facilities in the United States as outlined in the implementation plan when costeffective (as defined by the partner).
- Submit annual reports describing the BMPs and PROs implemented, the cost of implementation, and the associated methane emission reductions.
- Communicate participation to employees and cooperate with EPA efforts to publicize the Program.

General Terms

- 1. This agreement can be terminated by either party at any time, with no notice or penalties and no further obligation. EPA agrees not to publicize a partner's withdrawal from the Program.
- The partner agrees that the activities it undertakes connected with this MOU are not intended to provide services to the federal
 government and that the partner will not seek compensation from a federal agency.
- The partner agrees that it will not claim or imply that its participation in the Program constitutes EPA approval or endorsement of anything other than the commitment to the Program.

The public reporting and recordkeeping burden for this collection of information is estimated to average 38 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
