## Radiation Exposure Monitoring System (REMS) Data Elements

Data Element	Ciro	Instructions
	Size	Instructions
Monitoring Year	4	Enter the year for which the monitoring results are
		being submitted. The monitoring year, as defined in 10
		CFR 835.2 may differ slightly from the calendar year due
		to dosimetry processing schedules.
Organization Code	7	7-digit organization code, available from the
Telephone Option And Company of Second Secon	1000	repository. Whenever possible, the appropriate CAIRS
		organization code should be used. See Appendix E (2).
Facility Code	15	The code representing the facility where the dose was
racificy code	13	The code representing the facility where the dose was
		received for the personnel exposure records.
1	1	Organizations may determine the Facility Code using
1		printable ASCII characters of 15 characters or less.
1		The Facility Code assigned should remain consistent from
		year to year.
Facility Type Code	2	Code Facility Type Description
1 1.55		The state of the s
1		10 Accelerator
		22 Fuel Fabrication
		23 Fuel Processing
		40 Maintenance and Support (site-wide)
	1	50 Reactor
	1	61 Research, General
		62 Research, Fusion
	1	70 Waste Processing/Management
	1	in a contract of the contract
		1

	1	Codos
Radionuclide 1	7	Codes The scientific abbreviation of the radionuclide taken
	1 ′	into the body that contributed to the internal dose.
		Use the standard scientific format of "Xx999x", where
	1	"X" represents an alphanumeric and "9" represents a
		numeric character.
		List only the six highest contributors among the
		following fields. Enter only one radionuclide per field.  Do not include daughter products. When possible, list
		the radionuclides in descending order of their
		contribution to the internal dose.
Radionuclide 2	7	The scientific abbreviation of the second radionuclide
	-	taken into the body.
Radionuclide 3	7	The scientific abbreviation of the third radionuclide
Radionuclide 4	7	taken into the body.
Radiondelide 4	'	The scientific abbreviation of the fourth radionuclide taken into the body.
Radionuclide 5	7	The scientific abbreviation of the fifth radionuclide
		taken into the body.
Radionuclide 6	7	The scientific abbreviation of the sixth radionuclide
		taken into the body.
Committed Dose Equivalent	7	The 50-year Committed Dose Equivalent to the gonads from
(CDE) to the gonads		the intake of the radionuclides for this monitoring period, in millirem.
Committed Dose Equivalent	7	The 50-year Committed Dose Equivalent to the breasts
(CDE) to the breasts	1	from the intake of the radionuclides for this
Secretaria de Estados Destructuras de Secretaria de Secret		monitoring period, in millirem.
Committed Dose Equivalent	7	The 50-year Committed Dose Equivalent to the red bone
(CDE) to the red bone		marrow from the intake of the radionuclides for this
marrow		monitoring period, in millirem.
Committed Dose Equivalent (CDE) to the lungs	7	The 50-year Committed Dose Equivalent to the lungs from
(CDE) to the lungs		the intake of the radionuclides for this monitoring period, in millirem.
Committed Dose Equivalent	7	The 50-year Committed Dose Equivalent to the thyroid
(CDE) to the thyroid	1 50	from the intake of the radionuclides for this
		monitoring period, in millirem.
Committed Dose Equivalent	7	The 50-year Committed Dose Equivalent to the bone
(CDE) to the bone surface		surface from the intake of the radionuclides for this
Committed Dose Equivalent	7	monitoring period, in millirem.
(CDE) to the remainder	'	The 50-year Committed Dose Equivalent to the remainder from the intake of the radionuclides for this monitoring
		period, in millirem.
Total Effective Dose	7	The sum of the Deep Dose Equivalent (DDE) and the
Equivalent, (TEDE)		Committed Effective Dose Equivalent (CEDE) in millirem.
Dose Equivalent to the Embryo/Fetus	7	Dose Equivalent to the embryo/ fetus during the
Embryo/ recus		pregnancy from conception to the end of the pregnancy, in millirem. Dose determination should be made in
		accordance with DOE G 441.1-6, Evaluation and Control of
		Radiation Dose to the Embryo/Fetus Guide for Use with
		Title 10, Code of
		Federal Regulations, Part 835, Occupational Radiation
Commont Fort	150	Protection, dated 4-29-99.
Comment Text	150	Text of the comment applicable to the dose record in the data file. Comments should be limited to
		information needed to assess the record, such as
		references to additional documentation concerning
!		the record. If no comments are necessary, the record
Í		may be terminated with a carriage return and
		line feed at column 346 with one space entered for the
BIOASSAY SUMMARY		comment.
Total	5	Total number of individuals monitored in the bioassay
2010. A. W. G.		program or in vivo monitoring during the year.
Routine	5	Number of routine bioassay performed during the year.
Special	5	Number of special bioassay or in vivo measurements
		performed during the year.
Urinalysis	5	Number of urine samples analyzed during the year.
Fecal In Vivo	5	Number of fecal samples analyzed during the year.
TII ATAO	5	Number of in vivo measurements performed excluding wound counts during the year.
Wound	5	Number of in vivo measurements performed on wounds
		during the year.
Other	5	Number of other measurements performed in order to
		determine internal dose for an individual during the
TIVELY OF THE STATE OF THE STAT		year (e.g., air sampling or other method).
INTAKE SUMMARY		m)
Radionuclide	7	The scientific abbreviation of the radionuclide taken

		into the body. Use the standard scientific format of "Xx999x", where "X" represents an alphanumeric and "9" represents a numeric character. Enter only one radionuclide per record. Do not include daughter products or radionuclides that did not result in internal doses during the monitoring year.	
Mode	1	Mode of the intake.  H = Inhalation (record tritiated water intakes as inhalations.) G = Ingestion A = Absorption W = Wound, cut, puncture, injection or any other intake through broken skin.  A separate record for each mode and radionuclide should be reported.	
Collective CEDE	7	The collective 50-years CEDE from intakes of this radionuclide and intake mode during the monitoring year, in millirem.
