Instructions
APPLICATION FOR
APPROVAL OF NON-CDQ HARVEST REGULATIONS

GENERAL INFORMATION

The Western Alaska Community Development Quota (CDQ) Program is an economic development program associated with Federally managed fisheries in the Bering Sea and Aleutian Islands Management Area (BSAI). The purpose of the program is to provide western Alaska communities the opportunity to participate and invest in BSAI fisheries, to support economic development in western Alaska, to alleviate poverty and provide economic and social benefits for residents of western Alaska, and to achieve sustainable and diversified local economies in western Alaska.

The CDQ Program was developed to redistribute some of the BSAI fisheries' economic benefits to adjacent communities by allocating a portion of commercially important BSAI fisheries species to such communities. The CDQ Program was incorporated into the Magnuson-Stevens Act in 1996 through the Sustainable Fisheries Act (Public Law 104-297).

NMFS will allow vessels that are fishing for groundfish CDQ, while operating in a voluntary fishery cooperative, to submit to NMFS an application for the use of non-CDQ regulations when the CDQ regulations are more restrictive than the regulations otherwise required for participants in non-CDQ groundfish fisheries. This application may be submitted to NMFS at any time. Upon NMFS' approval, the use of non-CDQ harvesting regulations is effective. An approval is effective until the voluntary cooperative is no longer in effect, or until there is a change in the membership of the voluntary cooperative, whichever occurs first.

NMFS will approve an application to use non-CDQ harvest regulations when it determines that:

- ◆ All of the information submitted with the application complies with the requirements of 50 CFR part 679.32(e)(2) and (3),
- ◆ The vessels listed on the application form represent a majority of vessels participating in an applicable sector, and
- ◆ The relevant CDQ harvest regulations are more restrictive than the non-CDQ regulations for the applicable sector.
