Internet Data Collection Instrument Screen Capture Guide
(Mobile Version)

2018

How to Use This Guide

This document contains copies of screens respondents will see in the ACS Internet Questionnaire¹. You can use this guide as a reference when talking to respondents.

On the next page, you will see a table of contents that contains links rather than page numbers. Because you will be using this guide on your computer, this format will allow you to use **Ctrl + Click** on a page name and navigate directly to that page. Most of the screen capture names are the same as the page names in the instrument. Respondents can provide the page names to you from the URL in the address bar of their browsers. For example, the question for the type of unit at the sample address (e.g., mobile home, single family home detached from any other homes, etc.) is “typeofunit” in the Internet questionnaire. If respondents are on this screen, the address bar will display, “https://respond.census.gov/acs/typeofunit.”

Some screens may change text and appearance depending on the situation or makeup of the household. For example, the “pselect” screen asks respondents to choose the person for whom they will answer questions next. If only one person remains on the roster, the text displays differently than if multiple names are available. A second screen capture for the “pselect” screen reads “pselect (one person left on roster).”

Note: in the 2016 data collection year a mobile optimized view was introduced for the Internet Data Collection instrument. If respondents are viewing the online instrument via a mobile device the screen layout will appear different based upon screen size. In addition, navigation buttons containing “Previous” and “Next” are replaced with forward and backward arrows. Instructions, FAQs and Save and Logout text are removed and replaced with links on the right-hand side of the header. Questions with a large amount of text will not be displayed on one screen and users will have to scroll to view the entire questions text.

¹ This screen capture guide does not contain any Title 13 data or other personally identifiable information (PII). All data are fictitious and any resemblance to actual data is coincidental.

American Community Survey

Welcome to the American Community Survey.
You will need the materials we mailed to you to start the survey.

The U.S. Census Bureau is required by law to keep your information confidential. The Census Bureau is not permitted to publicly release your responses in a way that could identify this household. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

Login

The Census Bureau estimates that, for the average household, this survey will take 40 minutes to complete, including the time for reviewing the instructions and answers. You may email comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden, to: Paperwork@census.gov. Use "Paperwork Project 0607-0810" as the subject. Or you may send comments to: Paperwork Project 0607-0810, U.S. Census Bureau, 4600 Silver Hill Road, AMSD - 3K138, Washington, D.C. 20233.

Respondents are not required to respond to any information collection unless it displays a valid approval number from the Office of Management and Budget. The 8-digit number appears in the left side of the green bar at the bottom of the survey screen.

recovery (pin reset)

The image shows a mobile screen capture of the American Community Survey PIN reset process. At the top, the status bar displays 'Verizon', signal strength, Wi-Fi, time '1:26 PM', and battery '61%'. Below the status bar, the URL 'acs.respond.qa.census.gov' is visible. The main header is 'American Community Survey' in white text on a dark green background. The content area is light gray and contains a circular arrow icon on the left. The text reads: 'Please provide the answer to the following security question to reset your PIN and return to your survey.' The security question is 'What color was your first car?' with the note '(Not case-sensitive)'. Below this is an 'Answer:' label and a white text input field. At the bottom, there is a dark green button with the text 'Next' and a right-pointing arrow. A final instruction states: 'If you do not know the answer to your security question, please call 1-800-354-7271 for assistance.'

resp_name

A screenshot of a mobile application interface for the American Community Survey. The status bar at the top shows Verizon service, a Wi-Fi icon, the time 2:29 PM, and a 54% battery level. The URL in the address bar is acs.respond.qa.census.gov. The app header is dark green with the text "American Community Survey" and a hamburger menu icon. The main content area is light gray and features a question: "What is your name and your telephone number? We will only contact you if needed for official Census Bureau business. (Help)". Below the question are four input fields: "First Name" (a wide text box), "MI" (a small text box), "Last Name" (a wide text box), and "Telephone Number" (three separate text boxes for area code, prefix, and number). At the bottom of the form is a dark green button with a white right-pointing arrow.

- Page Title: Help

The main content of the help page is as follows:

Why We Ask?

We ask a series of specific questions about who lives or stays at an address to make sure everyone is included in the list and the list is complete based on the Census Bureau's definition of "live or stay."

Help

Select "Yes" to report more people you have not listed yet. Consider:

- Anyone who is staying there even for a short time, even if you are unsure whether that person should be included
- Anyone whose length of stay is uncertain, for example, a friend that is staying there while going through a personal crisis
- Anyone who has no permanent place to stay

Select "No" if you have already reported everyone who is staying there. You do not need to consider anyone who is **ONLY** staying overnight or for the weekend **AND** has a residence somewhere else.

Help

Why We Ask?

We ask questions about a person's age and date of birth to create statistics about different age groups, and to present other estimates by age group. Age statistics are used in planning and evaluating government programs and policies that provide funds or services for specific age groups, such as children, working-age adults, women of childbearing age, or the older population. These statistics are also used to monitor against age discrimination in government programs and in society.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Required to enforce against age discrimination in education, employment, voting, financial assistance, and housing.
- Used to plan programs and forecast

< >   

Verizon 1:53 PM 30%

acs.respond.qa.census.gov

- Used to plan programs and forecast future needs for programs that serve the elderly, including housing assistance programs.

Examples of Other Uses

- State and local agencies use these statistics to understand population changes, and the needs of a community over time.
- Researchers and advocacy groups use statistics about specific age groups (children, college students, working men and women, workers nearing retirement, older people, etc.) to understand current and future challenges and to advocate for policies that benefit their groups.

Help

This question consists of two parts: the first part asks for the date of birth, and the second part asks for the age of the person.

Date of Birth

- If you know the date of birth, enter it. The

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this

A blue '(Help)' link is positioned below the question. Underneath, the label 'Amount - Dollars' is displayed. The input field is a currency-style text box with a '\$' symbol on the left, the text 'Amount' in the center, and '.00' on the right. At the bottom of the question area, there are two dark green buttons with white left and right arrow symbols.

propvalue help

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, protect owners and renters, and provide and fund housing assistance programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed to protect owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

< > ↑ 📖 📄

Verizon 12:42 PM 99%

acs.respond.qa.census.gov

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

Help

- Report taxes for all taxing jurisdictions, including:
 - City or town
 - County

Verizon LTE 5:38 PM 51%

acs.respond.qa.census.gov

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, protect owners and renters, and provide and fund housing assistance programs.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

Verizon LTE 5:38 PM 51%

acs.respond.qa.census.gov

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed to protect owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Help

If unit is:	Then select:

Why We Ask?

We ask questions about a person's difficulty with specific daily tasks to produce disability statistics. These statistics are used by federal agencies to understand the population with disabilities, to monitor against discrimination, and to distribute funds, provide services, and develop programs for people with disabilities.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to report the housing needs of disabled persons. State and Local governments receiving grants from Community Development Block Grants program, HOME Investment Partnership Program, Emergency Solutions Grant and Housing Opportunities for Persons with AIDS programs, are required by law to report these needs.
- Used to enforce against discrimination in education and employment.
- Used to prepare and respond to disasters. Information about disability status, is used to estimate the size and nature of populations in a disaster-affected area and determine how best to respond to community needs.

Examples of Other Uses

- State and local agencies use these statistics to

Help

Why We Ask?

We ask about whether a person worked last week, and if the answer is no, why they were not working, and whether they are looking for work to produce statistics about the labor force. These statistics about the employed, unemployed, and those out of the labor force help the federal government understand more about unemployment and the availability of workers, plan unemployment programs and services, and plan programs to grow employment over time.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to enforce nondiscrimination provisions in employment by private employers, employment agencies, and labor organizations. Used in federal affirmative employment programs, to identify under-representation in job

< >   

Verizon LTE 4:43 PM 43%

acs.respond.qa.census.gov

identify under-representation in job categories, including veterans and people with disabilities.

- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- State and local agencies use these statistics to identify labor surplus areas (areas with people available for hiring and training), plan workforce development programs including job fairs and training programs, and to promote business opportunities.

Help

- Count as work → Select "Yes" if this person performed:
 - Work for someone else for wages, salary, piece rate, commission, tips, or payments "in kind" (for example, food or lodging received as payment for work performed)

acs.respond.qa.census.gov

Help

Why We Ask?

We ask about whether a person was a private employee, government employee, self-employed, or working without pay in a family business, to produce statistics about class of worker. These statistics are used to understand more about the type of ownership of employing organizations, to plan and measure education, employment, career development and job training programs, and to measure compliance with antidiscrimination policies.

[- Click Here to Collapse Additional Text](#)

Examples of Federal Uses

- Used to support cooperative agricultural extension work.
- Used to enforce against discrimination in employment by private employers, government agencies, and labor organizations. Used in federal affirmative

Verizon LTE 5:40 PM 33%

acs.respond.qa.census.gov

organizations. Used in federal affirmative employment programs, to identify underrepresentation in job categories, including veterans and people with disabilities.

Examples of Other Uses

- State and local agencies use these statistics to identify the percentage of people employed full-time, and the percentage of residents who work in each community year-round.

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking

Verizon LTE 4:43 PM 60%

acs.respond.qa.census.gov

funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Data are Encrypted at all Times

Our secure servers use "HTTPS", Hypertext Transfer Protocol over Secure Socket Layer, to ensure the encrypted transmission of data between your browser and the U.S. Census Bureau. This means that instead of sending readable text over the Internet, both your browser and our server encode (scramble) all text using a security key. That way, personal data sent to your browser or data you send back are extremely difficult to decode in the unlikely event it was intercepted by an unauthorized party.

All browsers connecting to our secure server must use a minimum encryption key size of 128 bits. If you cannot connect to our secure server and you are using an older browser, please upgrade to a newer browser capable of using the required encryption key size. In addition to data being encrypted while transmitted, all data are strongly encrypted when stored on our servers (even if stored

Verizon LTE 5:10 PM 73%

addition to data being encrypted while transmitted, all data are strongly encrypted when stored on our servers (even if stored temporarily).

Third Party Identity Proofing

Our secure server uses a digital certificate (digital ID) issued by a trusted, third party Certificate Authority (CA) as proof of identity. The only way to be sure of a web site's authenticity is to view their digital ID. In this way, you can be assured that you are not being "spoofed" or tricked by an imposter. The digital ID will contain information such as:

- The name of the organization that owns the web site (e.g., "U.S. Census Bureau")
- The site's registered Internet name/address (e.g., "respond.census.gov")
- The name of the Certification Authority under which the digital ID was issued (e.g., "VeriSign Trust Network")
- The method for viewing a web site's Digital Certificate/ID varies depending on the web browser. (For example, Mozilla's Firefox will display a clickable locked padlock icon in the

VI. Document Accessibility

The Census Bureau is committed to making online forms and other public documents on its Internet server accessible to all. Currently, we are reviewing our web sites and making modifications to those pages, which are not in compliance with the Americans with Disabilities Act. We use Hypertext Markup Language (HTML) to create pages that are generally accessible to persons using screen-reading devices, and we are careful in our construction of HTML documents to ensure maximum accessibility. We include alternate text describing graphics.

Many Census Bureau Internet documents are in ASCII or HTML formats. These documents are accessible to persons using screen-reading software. We also have a large number of documents in Adobe Acrobat PDF (Portable Document Format) files. Currently, many people using screen-reading devices cannot read documents in PDF format, specifically those that were created from a scanned hard copy.

Adobe Systems, Inc. is producing various products designed to make Adobe Acrobat documents accessible to persons using screen-reading software. Adobe's [accessibility web pages](#) describe their efforts.

Adobe Systems, Inc. is producing various products designed to make Adobe Acrobat documents accessible to persons using screen-reading software. Adobe's [accessibility web pages](#) describe their efforts.

To allow us to better serve those with visual disabilities who are having difficulty accessing PDF documents; you may contact us directly for further assistance at [301-763-INFO](tel:301-763-INFO) (4636), [800-923-8282](tel:800-923-8282), or by submitting a request at <https://ask.census.gov/>.

VII. Third Party Web Sites and Applications

The Census Bureau has a presence on several social media/Web 2.0 platforms (Facebook, YouTube, Twitter and Flickr, and other third-party services)) and clearly contain the Census Bureau's official logo. Each of these web sites provides the Census Bureau unique ways of sharing information. It also allows visitors with a way to communicate with the agency. Some may allow visitors to log in, create profiles and save information in those profiles. We do not collect any personally identifiable information about you through your use of these social media/Web 2.0 platforms. We may collect public information, such as user/screen name, city, state, and zip code of visitors to these web sites, and comments posted about the Census Bureau for statistical, research, and promotional purposes only. Further, the Census Bureau has no control over the third-party's use of this information and is not liable regarding the third-party's safeguarding your

It also allows visitors with a way to communicate with the agency. Some may allow visitors to log in, create profiles and save information in those profiles. We do not collect any personally identifiable information about you through your use of these social media/Web 2.0 platforms. We may collect public information, such as user/screen name, city, state, and zip code of visitors to these web sites, and comments posted about the Census Bureau for statistical, research, and promotional purposes only. Further, the Census Bureau has no control over the third-party's use of this information and is not liable regarding the third-party's safeguarding your information. These web sites have their own privacy, security and accessibility policies.

The Census Bureau will also use a third-party web site or application (hosted service) to conduct customer satisfaction surveys and/or feedback forms. These surveys and/or feedback forms may collect your name and email address for processing purposes. The results from these surveys or forms are used to conduct primary research into the quality of the Census Bureau programs and products. The results collected will be used strictly for internal program management purposes to assess staff work, material design and development and to enhance planning efforts for current and future surveys and censuses. In addition, other third-party web sites or applications may be used to host Census Bureau data products to be used by the public. These web sites do not require the use of personally identifiable information or business identifiable information.

VIII. Security & Third Party Links

A. Security, Intrusion, and Detection

To ensure that computer service remains available to all users, this government IT system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage to our computer system. Web sites identified as representing an actual or potential security threat to Census Bureau information and/or information resources are blocked. Further, web sites that are known to violate Census Bureau, Department of Commerce, and/or Federal guidelines regarding access to certain types of web sites and/or content are blocked, for example:

- Web sites hosting malware/spam
- Web sites involved in the compromise of other government agencies
- Adult content web sites
- On-line storage and file sharing web sites
- Freeware/Shareware web sites
- Web sites attacking Census Bureau systems (attempting to identify and exploit vulnerabilities in Internet facing systems)
- Web sites scanning Census Bureau systems (attempting to identify Internet facing systems)

B. Links to Other Web Sites

Our web site contains links to other federal

●●○○ AT&T LTE 9:38 AM 40%
