North American Wetlands Conservation Act Small Grants Program

Proposal Application Instructions May 2008

Postmark deadline: October 30, 2008

INFORMATION COLLECTION STATEMENT: In accordance with the Paperwork Reduction Act (44 U.S.C. 3501), please note the following. This information collection is authorized by the North American Wetlands Conservation Act (NAWCA) of 1989, as amended (16 U.S.C. 4401 et seq.). The information collection solicited is necessary to gain a benefit in the form of a grant, as determined by the North American Wetlands Conservation Council and the Migratory Bird Conservation Commission; is necessary to determine the eligibility and relative value of wetland projects; results in an approximate paperwork burden of 80 hours per application; and does not carry a premise of confidentiality. Your response is voluntary. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. This information collection has been approved by OMB and the assigned clearance number is 1018-0100. The public is invited to submit comments on the accuracy of the estimated average burden hours for application preparation and to suggest ways in which the burden may be reduced. Comments may be submitted to: Information Collection Clearance Officer, Mail Stop 224 ARLSQ, U.S. Fish and Wildlife Service. Washington, D.C. 20240 and/or Desk Officer for Interior Department (1018-0100), Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

ΝΟΤΕ

The following Proposal Instructions, associated information, and examples are designed to guide applicants already familiar with the purpose, scope, and expectations of the Small Grants Program in preparing and submitting their application. **Be aware that several changes have been made to the application format this year.** Therefore, to ensure your project proposal's eligibility and to improve its funding potential, **please be sure you first read all of the information provided** on the Small Grants Program's introductory Web page and Application Instructions Overview Web page, located at http://www.fws.gov/birdhabitat/Grants/NAWCA/Small/index.shtm.

Before you begin preparing your proposal, be sure to read the specific guidelines regarding the eligible use of grant and matching funds, eligible sources of match, and funding-use restrictions provided in <u>Appendix A</u>. This appendix provides summary guidelines and is not a complete list of all eligible and ineligible activities, sources of match, and uses of funding. If parts of your proposal are not addressed in <u>Appendix A</u>, or you are uncertain as to your project's eligibility, please contact the <u>Small Grants Program</u> or one of the U.S. Fish and Wildlife Service NAWCA Small Grants Coordinators: Ken Kriese at 703-358-1888 (ken_kriese@fws.gov) or Rodecia McKnight-Griffin at 703-358-2266 (rodecia_mcknight@fws.gov).

If your proposal includes property acquisition, including fee simple purchases and/or conservation easements funded with either grant or matching funds, it is imperative that you review the requirements for real property

acquisition assistance stated in the <u>Grant Administration Standards</u> document. Acquisitions may be made substantially less complicated if you are aware of the requirements ahead of time AND the appropriate documentation is completed in a timely fashion.

Remember that grant funds can only be used to fund activities that occur AFTER the grant proposal is received (pre-agreement period) and/or during the two year grant period. Activities completed prior to receipt of the proposal are ineligible for grant money and will not be funded.

BASIC REQUIREMENTS AND PROPOSAL INSTRUCTIONS Small Grants Program Proposal Application

I. COVER PAGE (1 page)

A. General Information

The cover page should contain the following information in the sequence specified.

- Project Title:
- Amount of NAWCA funding requested:
- Project Location (include nearest City, State, and County, Parish or Borough):
- Central Coordinates of Project Site (UTM's and Latitude/Longitude in Degrees Minutes Seconds)*:
- Congressional District:
- Applicant Organization:
- **DUNS Number**:
- Street:
- City, State, Zip:
- Project Officer: (Also list additional contacts if the project officer is not the official contact
- Telephone Number:
- Facsimile Number:
- Electronic Mail Address:
- Date Submitted:

* Note: For projects with more than one site, please include a central coordinate for each location in the proposal.

II. SUMMARY TABLE (1 page)

A. Purpose and Content

- To facilitate data processing and to help ensure the accuracy and completeness of your application information, please complete the <u>summary table</u> available from the link below. (This table does not replace other required parts of the application.)
- Information placed in this table must be based on, and refer only to, the immediate proposal, and not to any larger-scale project of which it may be a part.
- Boxes that appear gray have a drop-down menu. These items appear when the cursor is placed on the box and the arrow to the right of the box is selected. Scroll down the list and click on the one you want to add to the summary table. Do not type in your own information in the gray areas.
- Please try not to oversimplify your answers. For example, the purchase price of a parcel of land should be labeled "Fee Acquired" while Appraisal Fees, Closing Costs, etc. are "Other Acquisition Costs".
- Only include acre values for the following activities: Acquired, Donated, Restoration, Enhancement or Wetland Established. (See note below.)
- Numbers in the summary table <u>must</u> agree with corresponding data occurring in other parts of the application.

• Each grant and match dollar, except for indirect costs, must be linked to an acre acquired, restored, enhanced, or established.

MS Excel Summary Table

Note: Additive acres are new acres to the project and are counted as part of the total affected acres for the project. Non-additive acres are acres that are affected by more than one grant activity <u>and</u> which have already been counted as additive acres for the first activity. For example, a project with only one activity, such as restoration, will have all restored acres counted as additive acres. A project that will acquire property and then restore part or all of the acquired property will use additive acres for the acquisition and then non-additive acres for the restoration where the two activities overlap. Acres counted as additive acres in a previous NAWCA grant but are subject to a different activity in the new proposal will be counted as additive acres in the new proposal.

III. PROJECT DESCRIPTION AND SCOPE OF WORK, TIMETABLE, AND PARTNER INFORMATION (2 pages maximum)

A. Project Description and Scope of Work

Provide short summaries containing all of the following project information:

- need for the project;
- purpose, goals, and objectives;
- work to be done and by whom;
- who owns or will own and manage affected lands (see additional note below regarding the National Wildlife Refuge system);
- for acquisition projects (e.g. fee title, easement, contract), please list the known "rights" included with the property purchase/donation (e.g. water rights, mineral rights);
- for restoration/enhancement projects, please list the known "rights" currently held by the property owner (e.g. water rights, mineral rights);
- duration of benefits, including length of any land or management contracts, easements or other agreements; and
- expected results and how they will be monitored.

NOTE: In completing section A, address the overall purpose of the immediate project, the number of affected acres/hectares of wetlands and wetland-associated uplands with a brief description of how they will be affected, and any other information necessary to convey an understanding of what the project involves and what it will accomplish. If your project is part of a broader effort, be sure to explain how this specific project fits into the bigger picture.

NOTE: If your proposal will use grant funds to acquire property, and title to the property is not being transferred/donated to a National Wildlife Refuge (NWR), then please confirm that the property in question does not lie within the acquisition boundary of an NWR. (If you are uncertain, you can contact the realty officer at your nearest refuge. To find information about the wildlife refuges in your area, please go to: <u>http://www.fws.gov/refuges/profiles/bystate.cfm</u>. You can also download GIS shapefiles of the NWR acquisition boundaries by region at: <u>http://www.fws.gov/data/NWRdata.htm</u>)

B. Timetable

Provide a timetable that highlights the accomplishment of major activities. The timetable should:

- identify matching activities (old match) that were completed before the grant proposal was received;
- identify match and project activities to be completed either during the project period (maximum 2 years) or during the pre-agreement period (after the proposal is received by USFWS but before a grant agreement is signed);
- provide completion dates for old-match activities and estimated completion dates for new match/grant activities.

NOTE: Remember that grant funds can only be used for activities that occur from the day the grant proposal is received by the USFWS through the end of the grant period. In addition, all activities (grant and/or match) MUST be completed before the end of the two year grant period.

C. Partner Information

- Partners are individuals or organizations that provide a financial contribution (cash or in-kind) to the project.
- Provide general information about each partner, including: name; affiliation; role(s); and contributions (financial and otherwise) to the project.
- All partners listed here should also be included in Section VII.A of the proposal, as well as listed as Matching or Non-Matching Partners in the summary table.

NOTE: Partner Contribution Statements. Each matching (including the grantee and private landowners who provide funds and/or donate title to property) partner listed in the proposal <u>must</u> complete a partner contribution letter. These letters need to be signed and dated, and submitted with the proposal. Each letter should confirm the partner's commitment to contribute the amount of matching and/or non-matching funds attributed to them in this proposal. Failure to submit a partner letter will result in a reduction in your matching contribution by the value of said partner's contribution. If this reduction causes the grant:match ratio for your proposal to fall below 1:1, your proposal will be ineligible. To view a sample partner letter, see <u>Appendix B</u>. You are also encouraged to submit similar letters for each non-matching partner (including Federal partners), especially if the non-matching contribution is of significant value in relation to the requested grant funds.

IV. MAP OF PROJECT AREA (one, minimum)

Provide at least one map of the project area. If the project area is large and cannot be included on just one map, then more than one map is preferred. The map(s) should:

- be color (preferred) or black and white (acceptable);
- be drawn to large-scale detail (e.g., 1 inch = 1 mile, or greater);
- clearly identify the scope and location of the project;
- identify all project sites (including both grant and match activities);
- include latitude and longitude coordinates along the map's edge or for the center point of the project site(s); and
- contain sufficient detail and/or reference points (e.g. roads, cities, landmarks).

V. PHOTOGRAPH(S) OF PROJECT AREA (1-2 page(s), optional)

Photographs of the project area are desirable, but not required. If included, each photo should be accompanied by:

- a short, descriptive caption;
- the photographer's name/organization; and
- any copyright restrictions that may apply.

VI. PROJECT BUDGET (1 – 2 pages)

A. General Requirements

The proposal should contain a detailed budget table showing total project costs in the following manner:

- List the total cost per project activity (e.g., acquisition, restoration) and apportion these costs between grant dollars, matching partner dollars, and, if applicable, non-matching Federal (or Federal-source) partner dollars provided by each partner.
- Budget categories must be line items that specifically describe project costs (e.g. "salaries," "contractor services," "equipment," or "supplies.") Similar costs can be lumped into categories (i.e. "equipment" as opposed to separate line items for "tractor rental", "backhoe rental", and "300 feet of pipe purchased")
- Do not oversimplify budget categories. For example, "acquisition" should be reserved for the land value. Other eligible acquisition costs, such as appraisals or closing costs, are "other acquisition costs."
- In a separate column, provide the number of acres/hectares to be affected by the monies expended for acquisition, restoration, enhancement or wetland creation.
- Other grant costs not directly associated with acquisition, restoration, enhancement or establishment activities (e.g. grant administration, overhead, indirect costs) may not exceed 10 percent of the grant amount requested.

B. Budget Table Example

Use the budget table template provided in <u>Appendix C</u>. Modify the number of partner and activity columns as needed. You can also use the budget activity categories from the <u>Summary Table</u> to help with the budget table.

NOTE: Budget categories must be line items that specifically describe project costs. <u>Please check the figures</u> <u>listed to ensure they correspond with the budget numbers listed elsewhere in the proposal (particularly the</u> <u>Summary Table), in partner letters, or on the SF 424</u>.

VII. SMALL GRANTS EVALUATION QUESTIONS (2 pages maximum)

Briefly explain how your proposal addresses the following elements in each category. The answers listed here are used to evaluate the strength of the proposal, and the conservation value of the project. Be sure to provide clear, succinct answers and not just summary lists:

A. Partnerships

- Does the project involve a new partner or partnership concept?
- Is this project proposed by a new applicant who has not previously received a NAWCA grant?
- If applicable, how does this project encourage additional support (e.g., new partners; funding support; local or other governmental support) for migratory bird and wetlands conservation?
- Who are the partners (list each one) and how are they contributing to the project (dollar amount, inkind, cash, technical assistance, etc.)?
- This should not just be a copy of the list of partners provided in Section III.B. It should provide more information about the different partners and their individual contributions to the project.
- All partners described here should also be listed in both Section III.B and the Summary Table.

B. Waterfowl

- How will the completed project benefit waterfowl? Be sure to reference individual species whenever possible, especially the priority populations/species listed below?
- Focus the answer on those species that the project is designed to substantially benefit.
- Consider the typical geographic range of the population or species; do not cite benefits for species that are casual or accidental in occurrence.

High Priority Populations/Species: Tule Greater White-fronted Goose, Dusky Canada Goose, Cackling Canada Goose, Southern James Bay Canada Goose, Northern Pintail, Mottled Duck, American Black Duck, Mallard, Lesser Scaup, Greater Scaup

Other Priority Populations/Species: Pacific Greater White-fronted Goose, Wrangel Island Snow Goose, Atlantic Brant, Pacific Brant, Wood Duck, Redhead, Canvasback, Ring-necked Duck, Common Eider, American Wigeon.

C. Nongame and Other Wetland-Associated Migratory Birds

- How will the completed project benefit nongame migratory birds, particularly those listed in the tables in <u>Appendix D</u>? Focus on those species that will benefit most from the project.
- The bird conservation plans websites provide further information (with contact information for the plan coordinators)
 - Partners in Flight (songbirds) (<u>http://www.blm.gov/wildlife/pifplans.htm</u>) (<u>Terry_Rich@fws.gov</u>)
 - US Shorebird Conservation Plan (<u>http://shorebirdplan.fws.gov</u>)
 - (Brad Andres@fws.gov)
 - North American Waterbird Conservation Plan (<u>http://www.waterbirdconservation.org</u>) (Jennifer_A_Wheeler@fws.gov)
 - Joint Venture plans (<u>http://www.fws.gov/birdhabitat/JointVentures/index.shtm</u>) (<u>Guy B Foulks@fws.gov</u> for national coordination, or contact individual Joint Venture Coordinators through the above link)

D. Endangered Species

• Will the completed project benefit any endangered birds or other endangered wildlife, including federal- and/or state-listed species?

- **Note:** The list of Federal endangered or threatened species, maintained by the U.S. Fish and Wildlife Service, can be found at the Endangered Species Program's Web site, located at <u>http://www.fws.gov/endangered/wildlife.html#Species</u>.

- Address only those project activities that will contribute directly to a Federally-listed threatened/endangered species recovery plan or that will provide critical habitat for Federal- or State-listed threatened or endangered species.
- Indirect, minor, or unknown benefits related to such species which may use the project area should not be included.

E. Wetlands Types

- What type(s) of wetlands <u>in this project</u> will benefit from the completed work? Refer to the list of wetland types provided in <u>Appendix E</u>.
- <u>Provide the total project acres/hectares and quantify, using percentages, the amount of each type of wetland involved</u>.
- Keep the explanation clear and the numbers consistent; acre/hectare figures here must agree with those provided elsewhere in the proposal.

F. Special Considerations

• Are there any special considerations, outside of sections A-E above, that you feel should be factored into project evaluation (e.g., outstanding ecological resource value, threats, historical record, opportunities, conservation trends, or benefits not represented elsewhere?)

Appendix A: Eligibility Requirements for NAWCA Grant and Matching Funds

<u>Grant Funds:</u> May be used for project activities necessary to meet proposal objectives that occur:

- during the two-year project period (starting the date in which the grant agreement is signed); or
- during the pre-agreement period (after the proposal is received but before the grant agreement is signed).

<u>Note:</u> Project costs incurred after receipt of the proposal will *not* be reimbursed if the proposal is not approved for funding. In addition, project activities that occur before the receipt of the proposal are <u>ineligible</u> as a grant activity and will not be reimbursed with grant funds.

Matching Funds: May be used for project activities necessary to meet proposal objectives that occur:

- during the two-year project period (starting the date in which the grant agreement is signed); or
- during the pre-agreement period (after the proposal is received but before the grant agreement is signed);
- no earlier than 2 years prior to the date the proposal is submitted (back to beginning of calendar year).

Additional Eligibility Issues:

1. Matching contributions may take the form of cash, goods, services, or land value and must be:

- at least equal the grant request;
- permanent, non-reimbursable, and dedicated to a project; and
- documented by a partner letter.
- 2. Funds from the following sources must be documented and may be used to match NAWCA grants:
 - those without a Federal origin (money from the National Fish and Wildlife Foundation and U.S. Fish and Wildlife Service's Federal Aid program are of Federal origin);
 - those that have not been successfully used to match other Federal grants, including grants from the National Fish and Wildlife Foundation and U.S. Fish and Wildlife Service; and
 - those from The Indian Self-Determination and Educational Assistance Act, P.L. 93-638, of 1975
- 3. Costs incurred prior to grant execution which may be eligible as matching funds include:
 - appraisal fees, acquisition negotiations, land acquisition legal costs;
 - boundary surveys;
 - engineering and project design;
 - required State and Federal compliance activities;
 - travel and transportation;
 - consulting fees; and
 - special studies.
- 4. Grant and matching funds may be used to pay for or have as their source project expenses directly associated with land acquisition (fee-title, conservation easement, lease or donation), long-term wetland restoration, enhancement, or wetlands creation. Expenses must be:
 - necessary and reasonable for the proper administration of the project;
 - documented and verifiable from the grantee's and sub-grantees' records;
 - representative of fair market value (in the case of acquisitions, the appraised value);

- a special expense caused by the project;
- the result of work done on-site(s) and:
 - o within the same wetlands system (e.g., watershed or river basin), and/or
 - o managed to meet the same wetland objectives, and/or
 - that are close to each other;
- distinctly identified as an undivided interest of the total acres involved when part of a larger project supported with non-match funds; and
- salary and labor of employees hired to manage the project after the grant agreement is developed.
- 5. Grant and matching funds may be used to pay for or have as their source the following project expenses:
 - equipment expenses that are prorated;
 - material and supply costs;
 - annual payments for 10 year conservation agreements (or the maximum duration allowed by State law);
 - previous monitoring and/or evaluation of wetlands conservation activities if the results are critical to the design of a submitted proposal; and
 - initial management costs.

Ineligible Grant and Match Cost:

- routine expenses of the contributor;
- project management salary costs prior to grant execution;
- project planning and proposal development, including investigations to document the project's resource value;
- conservation education materials or salaries;
- fundraising;
- law enforcement;
- research;
- boat ramps, parking lots, roads, and other public access work;
- observation towers and blinds;
- routine operations and maintenance salaries and costs;
- building construction, repairs, and value of donated property;
- the value of existing residences, structures, and buildings unnecessary for wetland conservation purposes and the cost to construct, remove, or repair same;
- equipment acquisition in lieu of a more cost-effective means (e.g. renting, using equipment on hand);
- acquisition of vehicles;
- costs over the appraised value for fee-title and easement acquisitions; or
- short-term annual conservation activities, such as predator management.

In addition, grant funds may not be used for:

- actions that put credits into wetlands mitigation banks;
- Federal mitigation compliance under the Fish and Wildlife Coordination Act or the Water Resources Development Act, including mitigation required by the U.S. Army Corps of Engineers under Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act;
- work completed prior to submission of the proposal <u>completed projects/activities</u> are not eligible for <u>retroactive funding</u>; or
- interest payments.

Appendix B: Sample Partner Letter

November 1, 2007

Dear Council Coordinator: (Letter may also be addressed to grant applicant)

We are committed to providing \$100,000 (amounts of \$75,000; \$20,000; and \$5,000 explained below) to match the grant request for the proposal titled "Duck Creek Restoration, Arizona." Contributions are eligible according to factors given in the Small Grants Instructions. Following are details pertaining to our contribution.

The Sherman tract, consisting of ca. 30 ha, was acquired in fee-title on July 4, 2006 for the fair market price of \$75,000. This is the main source of water for the Duck Creek Restoration project. The source of funds was a dedicated land acquisition account. The property was donated to the Arizona Game and Fish Department on July 20, 2006.

It is our plan to raise \$20,000 to aid in the restoration of the Sherman tract. If funds are not raised, we will use existing funds from another account under our control.

Five-thousand dollars (\$5,000) was spent on the restoration and enhancement of two wetlands during April and July, 2006. (See Tracts B and C on enclosed map.) Fencing the dike and upland areas was necessary to keep cattle out, and seeding the dike and spoils areas was done to encourage natural vegetation for cover for duck production. The restored wetlands in our match are in the same watershed and adjacent to other tracts in the Duck Creek proposal. The value was determined as follows:

33 hours labor @ \$15/hr = \$495 5 hours tractor @ \$30/hr = \$150 5 rolls of fence @ \$36/roll = \$180 35 posts @ \$5/post = \$175 \$1,000 per site x 5 sites = \$5,000

The Harmony Watershed Project Plan, which the partnership is committed to implementing, includes all of the tracts in our match. These tracts, plus others in the proposal, will be managed to meet the same wetlands conservation objective of increasing quantity and quality of waterfowl habitat. Sincerely,

Chairman of the Board Friends of Harmony Watershed Enclosures

Appendix C: Sample Project Budget (Expand, for more than 2 partners.)

Category	NAWCA Grant Funds	<name of="" partner<br="">#1></name>	<name of="" partner<br="">#2></name>	Expense per Category

Appendix G: Standard Form 424, Application for Federal Assistance & SF424D, Assurances for Construction Programs Form

The two forms can be accessed at the following page: <u>http://www.grants.gov/agencies/aapproved_standard_forms.jsp</u>

I. <u>Standard Form 424</u>. (Please use the SF-424 Core Form.)

NOTE: The SF 424 was updated in October 2005. We will only accept the updated form. It is required to obtain a DUNS number from Dun and Bradstreet in order to apply for any Federal grant. Instructions for obtaining a DUNS number are found at the grants.gov website above.

CELL NUMBER and TITLE	INSTRUCTIONS
1. Type of Submission	See instructions on back of SF 424.
2. Type of Application	See instructions on back of SF 424.
3. Date Received	Leave blank
4. Applicant Identifier	Leave blank.
5. a. Employer Identification	Leave blank
5 .b. Federal Award Identifier	New applications leave blank.
6. Date Received by State	Leave blank
7. State Application Identifier	Leave blank
8. (a-e) – Applicant Information	See instructions on back of SF 424.,c. *DUNS # required
9. Type of Applicant	See instructions on back of SF 424.
10 – Name of Federal Agency	Enter "U.S. Fish and Wildlife Service"
11 – Catalog of Federal Domestic Assistance Number and	Enter "15.623" and "NAWCA U.S.SMALLGRANTS"
Title	
12. Funding Opportunity Number/Title:	Enter "15.623" and "NAWCA U.S. SMALL GRANTS"
13. Competition Identification Number/Title:	Leave blank
14 – Areas Affected by Project	Enter only information for "Counties and States".
15. Descriptive Title of Applicant's Project	Enter title used in Part 1 of proposal.
16 – Congressional Districts of Applicant/Project	See instructions on back of SF 424.
17. Proposed Project Start and End Dates	Leave blank
18 – Estimated Funding	Do not include non-match \$. In "a", only include NAWCA
	grant \$. In "b-e", only include matching partner \$. For "e-
	Other ", include private organizations, etc. Leave"f-program
	income'' blank.
19 – Is Application Subject to Review by State EO 12372	Only applicable to states. Please visit:
Process?	http://www.whitehouse.gov/omb/grants/spoc.pdf
20 – Is Applicant Delinquent on any Federal Debt?	See instructions on back of SF 424.
21 – Authorized Representative	SIGNATURE AND DATE REQUIRED by the authorized
	representative of the applicant organization. We will not
	accept a typed signature. Please scan signed document or
	insert an electronic signature and send electronically as part
	of the proposal application. Downloads from Grants.gov
	must also be signed as noted.

II. <u>SF424D Assurances-Construction Programs form</u> (**Rev. 7-97**). The SF424 Assurances for Construction Projects are required for all NAWCA projects (all projects that involve acquisition, restoration, or enhancement are considered construction projects). All Federal grant recipients must comply with the laws listed on the Assurances form. Please sign, date, and return with your completed application.
