Subject RE: Per Today's phone call--Review & Consultation for Draft
Consolidated ICR

History:

☞ This message has been replied to.

Applicable questions answered on the attachment for your use and review.

And, on another note, the fundamentals of the different reviews are laid out as clearly and concisely in this document than any I've seen - would it be alright to "borrow" from the basics as you describe them here in future communications with non-PhD crowd in the country (don't think I could write it more clearly?)...kudos to the "translators" who put this one together!

Ms Adcock,

It was good to talk to you today and we very much appreciate your participation in this Pesticide Data Call-In (DCI) Consolidation ICR Review and Consultation Process. Below, you will find additional information regarding background, action outline, relevant attachments, link to the docket, and contact names and numbers.

Background

The Environmental Protection Agency's (EPA), Office of Pesticide

Programs (OPP) is proposing consolidation into one document the ICRs for Data Call-Ins for the following program ICRs:

Special Review and Registration Review Programs OMB Control No.: 2070-0057; EPA ICR No. 0922.07;

Data Generation for Pesticide Reregistration OMB #:2070-0107 EPA #:1504.05

Data Acquisition for Anticipated Residue and Percent of Crop Treated OMB No.:2070-0164; EPA No.: 1911.02 ICRs.

These ICRs are currently due to expire on the same day, June 30, 2008. This new ICR consolidates other DCI ICRs that are already approved by OMB and does not create any new rules, guidance or other requirements-it simple consolidates into one document three existing program ICRs.

Action

In an effort to actively seek input from registrant associations and the public, EPA is contacting you to ask for your feedback regarding this consolidated Information Collection Request (ICR). Please use the "EPA Questions Asked in Consultation " form attached when crafting your response. Also, please note that your comments/feedback will appear in a publicly available document along with your name and e-mail address (the Docket for this ICR action). Your response to this request would be most appreciated with the next week to 10 days (by April 11th if possible), however, if your response comes in after that timeframe, the Agency will enter your response directly into the Docket.

Attachments

I am attaching the following 2 documents:

1. Consultation questionnaire (See attached file: consultation questions 08.doc)

2. Draft Supporting Statement for the Consolidate ICR (See attached file: Draft DCI ICR Supporting Statement.doc)

Note: this is the draft supporting statement without all the attachments; if you would like to see the full docket, you can search for EPA-HQ-OPP-2007-0923 (cut & paste link below into Internet Explorer.
