MADVAPES%

- clear INDUSTRY LEADER headquartered in Mooresville, NC In July 2015, two well-known organizations in the vaping industry merged, creating a
- branded stores. Expect 80 locations by year-end and a goal to grow to +1,000 in 3-5 We believe we have the LARGEST RETAIL platform in the Vaping Industry with over 75
- ROBUST E-COMMERCE division with industry leading SEO placement
- Consumer sites with over 150,000 customer database
- Two wholesale divisions with reach to over 5,000 accounts.
- Strong pipeline of PRODUCT INNOVATION in both branded E-Liquids and Hardware
- Investing in our liquid production capabilities recently launched Patriot E-liquids
- Recently launched Deviate and Blacksmith MODs made in Mooresville, NC containing US made electronic components.
- Growing sales channel into C-STORES and other traditional combustible sales channels

Madvapes by the Numbers

- Over 300 employees (majority based in NC) under its corporate owned infrastructure.
- Approximately 40 of these employees work in our manufacturing and innovation center in Mooresville, NC.
- In addition, our licensees employ approximately 100 full and part-time associates.
- Madvapes currently has enrolled 122 employees (plus families) on its company's health care plan
- Has supported Folds of Honor with more than \$25,000 in the past 5 months.

- Madvapes will pay approximately \$1,000,000 per year in excise tax collected on the sale of e-liquid in North Carolina.
- Corporate owned retail locations will generate approximately \$1,000,000 in sales tax revenue for the state of North Carolina in 2015.
- Supply over 6,000 vape stores in North Carolina and throughout the United States.
- Expanding presence into Europe and are expected e-liquid sales into China

With anticipated growth, Madvapes intends to employ over 5,000 associates within the next 5 years; however, FDA regulations will affect growth.

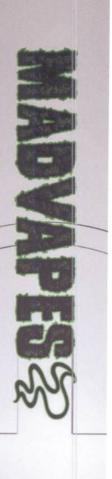

of, the intended regulation. Executive Order 12866 technical, economic, and other information concerning the need for, and consequences Each agency shall base its decisions on the best reasonably obtainable scientific,

FDA Deeming Regulations

- pre-market approval Under the deeming regulations, all new products since February, 2007 would require
- Current pre-market approval process requires both product studies as well as population studies
- approval as is required in the Tobacco Control Act. To this date, the FDA has approved only one application for pre-market
- especially considering it is primarily driven by smaller companies The FDA's pre-market approval process will make innovation difficult,

Vaping is an alternative to traditional tobacco products and should have an alternative set of regulations to tobacco that take into account the lower risk aspects of the product.

Madvapes

- continue to decrease the consumption of traditional tobacco products. standards for all e-liquids that would protect the public's health while allowing consumers to Madvapes believes that the FDA should set appropriate and proportional uniform safety
- Madvapes is a member of AEMSA (American E-liquid Manufacturing Standards Association).
- independent labs. All e-liquids manufactured by Madvapes undergo testing to meet AEMSA standards in
- Madvapes actively participates in the we card program and has a strict age verification process in place for its e-commerce sales channel
- Madvapes currently has 16,750 SKUs. Each of which would require pre-market approval tobacco consumption. from the market that are currently enjoyed by users that have helped them reduce or stop under the proposed deeming regulations. A significant number of products would be removed

The proposed deeming regulations might actually hurt public health if products are taken off the market due to regulatory costs or new products do not come to market.

Consequences of FDA Deeming Regulations

- The approximately 2,000,000 people who are currently using vapor products would either:
- Turn to smoking combustible cigarettes,
- Purchase products from unscrupulous dealers with no regard to testing or safety,
- Not receive new products that might stop them from returning to smoking.
- Current smokers will no longer have an effective alternative to combustible cigarettes.
- New products that have the potential to provide a more safe and effective alternative will likely not go to market
- Many, if not all, of the more than 10,000 vape stores will be forced to close, displacing thousands of employees.

MADVAPES E-CIGARETTE USAGE SURVEY

- 9,182 survey takers responded with answers based on their experience with electronic cigarettes
- through affiliate websites from customers at corporate brick-and-mortar stores, Facebook, Instagram and The survey was conducted over a four week timeframe with responses collected
- constant technological advancement The survey results show that consumers demand a variety of e-liquid flavors and
- decade of vapor products from the market of the pre-market approval process which will result in the removal of nearly a development. The majority of manufacturers will be unable to meet the demands stringent requirements will result in a decrease in variety and delayed product The increase in manufacturing costs for the few companies capable of meeting the
