Recruiting Volunteers for a Research Study

A Home Assessment Disaster Preparedness Study for Children and Youth with Special Health Care Needs

About the Project:

We want to better understand what caregivers of children and youth with special health care needs should have to be prepared in an emergency or natural disaster. We would like to test an emergency preparedness checklist the research team has developed, to see if it meets your needs.

We would like your help with:

- Answering some questions about preparedness while we are in your home, virtually/telephonic or in-person.
- Allowing us in your home again 3-6 months later for another home visit, virtually/telephonic or in-person.
- Providing feedback to the team on the visiting process

Our goal is that this project will help you and your family be more prepared if an emergency or natural disaster were to occur.

Payment:

You will receive a \$50 gift card at the completion of each home visit (two visits total).

You may be able to participate if:

1. **You are a primary caregiver of a child or youth with significant special health care needs, and,**
2. **Your child or youth is between 0-26 years old, and,**
3. **You speak English or Spanish, and,**
4. **You live in Pennsylvania**
5. **You have access to a phone.**
