What is the proposed implementation date for both of these reports? The changes would require significant system changes and staff time, both of these resources are limited due to COVID-19. There would need to be enough time to allow for a successful implementation.

What is the purpose and scope of the Apprenticeship Outreach: Organization/Employer Record Layout report?

The Apprenticeship Outreach: Organization/Employer Record Layout requires a lot of detailed information to be reported for each apprenticeship sponsor. There are some concerns about collecting all of the detailed information required if there is no incentive for employers to provide this information.

It seems that some of the information in the Apprenticeship Outreach: Organization/Employer Record Layout is duplicated from what is reported through RAPIDS and what SRE's will be required to report for IRAPs.
