---

Dear Committee

I appose making changes to the portal of how people can communicate their concerns on these tariffs. Clearly there were a lot of people apposed to these changes as there were so many thousands of emails received. Putting up barriers for people to express their opinion simply makes this process less open and less democratic.

I hope our government wants to hear from all of its people who would like to express themselves and not create unnecessary obstacles so that fewer voices are heard.

Thank you,

Jeff
