For Enrollment/Disenrollment:

- For Enrollment element K, we recommend CMS add in verbiage that states, “as defined in the Medicare Communications and Marketing Guidelines.”
- For Enrollment element I, we recommend CMS includes clarification as to whether this includes enrollments via third-party websites.
- In Enrollment element B and Disenrollment elements B the language that clarified that no additional information was required from the applicant (or his/her representative) has been removed. We recommend CMS re-insert this language to these elements for clarity.
- For Disenrollment element C, the language that clarified that additional information was required from the applicant (or his/her representative) has been removed. We recommend CMS re-insert this language to this element for clarity.
