The SBDC change to the 641 is a document we would suggest that their lawyer review. Sad that a client should get a lawyer to get help.

Also when you say free and confidential counseling, it should remain free and confidential. Over managing this is a travesty.

Should they be a citizen to get counseling, where does it ask if they are a citizen?

Confidential means confidential, why would we share this with other agencies.

Why would a business waive all claims?
