Unfortunately, these changes threaten small business privacy and the confidential relationship between SBDCs and the small businesses they serve, which is me. This doesn't need any further governmental monitoring. Also, the information request in section 11 of Form 641 is confusing. Would I be agreeing to surveys, or will you also be solicited for services you don't want? This information collection is unnecessary. SBA has no need for my contact information in order to do its job. My personal information is not a performance indicator.
