Why doesn't the form mention by law section 21 (a)7 of the Small Business Acts SBDC's are supposed to protect the small business/client's privacy. We should be told that BEFORE checking any box that gives away our privacy.

Section 11 of the form 64 regarding information request is very confusing....."Are you agreeing to surveys, or will you also be solicited for services you don[t want?"

Simpler to ask separate questions if the information is deemed necessary, information if for surveys could be supplied late. Should have several choices.

What purpose is served by soliciting a small business for other services, how is that an appropriate information collection.

Who are SBA's agents? Information collection should not allow for dissemination beyond the SBDCs. SBA should protect all information to the extent permitted by law. Simpler to not collect any information as the law implies at this time.
