I fully support keeping my business information private and not have the SBA circumvent the current privacy policies.

The reason for this is that I want to keep control of my business information and determine which information is made available to the public. This will ensure that my business is fully in charge of the messaging about our services to our potential clients. This is the responsibility of my business and not the SBA. Maintaining the current privacy policies will allow the SBA to continue to support small businesses without infringing on the rights of those same businesses to determine what information is shared publicly.
