I am concerned about the changes and vague language proposed for the revisions of Form 641.

1. There is no need to potentially jeopardize client privacy.
2. "Services" needs to be spelled out - way too vague.
3. Who will be using this information and how?
4. Seems like government over reach.

I understand that SBDC is associated with SBA, but they serve different functions and I expect that my local SBDC office should continue with confidentiality and protection of my privacy.
