Subject: 0655:0000 comment; Time Burden Empirical Data-Daniel Kegan
Date: Monday, February 15, 2021 11:07:13 PM

OMB Control Number: 0651-0009.

OMB/PTO Request for Time Burden for Trademark Application Submitted by Daniel Kegan, PhD, JD, Chicago IL.

I below present my estimates of the burden for a private practice trademark attorney to prepare and file a federal trademark application: use-TEAS Plus, use-TEAS Standard, ITU-TEAS Plus, and ITU-TEAS Standard.

MYSELF

I are a solo greatitistice, and have previously been an atterney with a small firm, with from face to one other attempts, Admittad to the Illinois her in Neverther 1984.

80 years ago, I have field over 201 trademuke applications. First Side one as the attempt of coordinate and the attempt of record for 274 applications. I have also supervised scores of trademark filings by associate atte

In addition to my JD, I camed a PhD in organization theory, with a strong emphasis in research methodology. I have

For single infinitely will be their processors of the group of interact. Moreover, voluntary solutions to a request for from that likely systematically delifer from those who do not participate. A none reliable time between overall containing the obtained stating with the PTO's own data from 2000 or far 2019, before the Croix-1-9 pandomic. A statisfied analous supple of lifers could be obsent, smoog unjoin feiter (rule into principle, fifter of a for applications, and first or funny applications. Review of the actual distribution will suggest manifold apparentation.

ANSWERS TO REQUEST FOR COMMENTS

IV. Request for Comments The USPTO is soliciting public comments to:

(a) Evaluate whether the proposed cellection of information in necessary for the proper part *Some information is manifoldly regarded, such as much, goods/services, first use date, explicant turner, with of formation, name and adulates of files, the cause of relative security goals seem better suited: Applicant domain (where sleep), applicant small.

(b) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collect * inaccurate, drastically under estimates even for an experience, sophisticated applicant with a short strong trank and simple single-class goods/service expeated from prior application with same goods service and different trank.
