I would like to provide my support for extending the regulations that support the Survey of Earned Doctorates Document Citation: 86 FR 8385 and number: 2021-02449. As a doctoral holder, researcher, and higher education administrator who works with accreditation agencies, I have found the SED helpful in benchmarking and recruitment efforts. Without the information, we would be hampered in our shared goal of enhancing and supporting the advancement of science in our field.
