Subject: [EXTERNAL] public comment on federal register- waste of money for this survey which is slanted and biased to only listen to profiteers

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

this survey is slanted and biased on use by recreationists at reservoirs. first of all reservoirs are not water bodies that can be desecrated. they are vital bodies of water that need to be clean to serve as drinking water that goes into people's bodies. i am not in favor of wholesale "recreation" at reservoirs. this is outrageous and then this survey is pointed to only get comments from users and those who can make money from use of those drinking water sites. what a slanted, biased group to get comments from and not to get comments from many who want pure drinking water not filled with pee or plastic from users. we have a real plastic problem in the usa these days. we have a problem with algae growth from farmers putting toxic chemicals in the water which does drain off to our reservoirs.

none of that is covered and protected by this stupid survey that appears to be a giveaway to profiteers to use our public lands and waters. no i am not in favor of this survey at all. it is another govt attempt to only work for profiteers and to ignore the needs and wants of the entire us population of 330,000,000. this comment is for the public record. please receipt. b ker bk1492@aol.com
