

these foreign students are in many cases spied paid by the govt to come here to steal american secrets. many have been found workkign in universities doing exactly that - stealign things. it is time to shut down these foreign students. our universities have enough to do to let in american students and american studetns should not be kept out by having spots taken up by foreitners. this constant attempt to flood the usa because they get higher rates from foreigners is sick and moneymad. the colleges are prostituting themselves these days for money. they have no ethics left at all. shut down all these foreign spies.

our colleges were built for american studetns, not foreigners.
