## General Comment

the fee for this service by teh govt is very very low. also how does the govt maintain any kind of privacy for this kind of information. certainly with all the hacking going on nothing is safe and manipulation is centirely possible with this service. frankly, the bank itself can demand more papars from teh account holder to validate his/her pronouncemens. that can also validate that what the potentiall iar is tellin the truth or not. this service by each bank can dnad should be validated much more thoroghly by the bank itself. i find the fee charged by our govt much too cheap and in fact the peopel of this country are payin the costs for hte bnaks. let the banks pay higher fees forthis service.up the fees by 2000%.
