this study survey is entirely unnecessary. it is just fat cat bureaucracy. nobody needs to know what youth did in 1997 but you can be sure in 2021 they are out there burning, looting and murdering each other and burning down govt buildings in cities all over this land, and to me this shows that our education system for our youth is seriously out of whack. more of them need to be workikgn in jobs to get money to eat. right now they get all the free food and rent and school and medical care they could want so they feel no obligation to do a damn decent thing to help this world. instead they are out there destroying the world. we saw that all last summer. its is disgusting. it is no way to help this country at all. it is in fact a destructiyon of this country that is taking place and we need to stop it now. put them to work. put them in the army . do something to keep these youth occupied. right now they dont have anythign to do to survive so they destroy. this survey is part of this focus on youth who are destroying this nation and i am sick of it. take away the money from the youth. take away the surveys. put them all to work building instead of destroying. work on the damn roads that are falling apart and if you dont work you dont eat. its time., we are sick and tired of a govt under alzeheimers joe biden that is not working.
