Subject: thes hobbiest got tapayer dollars to survey for their slant and bias

this slanted bias pro hunting piece of trash needs new thinking and taken away from its slanted, biased paeen to killing wildlife that it has become. it does not fairly or accurately put forth any information on wildife and the way the majority of americas 330,000,000 citizens want information collected that will respect, protect, preserve and keep alive americas wildlife. it has been slanted and biased to laud hunter and killers of wildlife. it needs a long overdue change to reflect the majority of americans.

try geeting a new provider besdides this organization in chicago p their dlanted biased collection of information needs 2020 application of american thinking, since we are all aware of extinction going on every single day in america and the world. the colletino of information must be aware of this. the last report did absoluehynothing to enhance clarity or qualifyt of the status of wildlife in americawhya re taxpayer funding this slanted bias collection of information

the \$1 billion from taxpayers has not been used by state wildlife agencies to save any species at all. their record is abysmal. these state wildife agencies misuse the american tax dollars tokill wildlife and make money for the empoloyees -high salaries prevail and endless wildlife extinction with this \$1 billion. they use the \$1 billion to log our forests, killk our wilife, use chemicals to kill america and cause extinction. this \$1 billion has been viciously misused.

the huge role of wildlife watchers has been overlookedentirely. their spending is massive compared to wildlife killers. this is not l86 ameriuca. this is not 1940 america. this is 2020 america and we are facing wildife extinction and this colelction of information totally ignores that factor. catering to afwa with its small group of safari killers, nra killers, etc is not america anymore. they are a veyr small part of america and notorious by most americans as being vicious killers. this collection has been ignroing the majority fo americans who are wildlife watchers. they are not getting proper due from this collection. the colelction has been slanted against them and they are 98% of america. stop the alanted, biased collectino of information for an obsolete small hunting group of violent wildlife killers. this commetn is for the public record. please receipt. jeanpublicee jean public1@gmail.com

FVWF54200900000-XXX-FF09W13000; OMB Control Number 1018-0088]

Agency Information Collection Activities; National Survey of
Fishing, Hunting, and Wildlife-Associated Recreation (FHWAR)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we,
the U.S. Fish and Wildlife Service (Service), are proposing to
reinstate a previously approved information collection with revisions.

DATES: Interested persons are invited to submit comments on or before
July 13, 2020.

ADDRESSES: Send your comments on the information collection request by
mail to the Service Information Collection Clearance Officer, U.S. Fish
and Wildlife Service, MS: PRB (JA0/3W), 5275 Leesburg Pike, Falls
Church, VA 22041-3803; or by email to Info_Coll@fws.gov. Please
reference OMB Control Number 1018-0088 in the subject line of your
comments.

FOR FURTHER INFORMATION CONTACT: Madonna L. Baucum, Service Information
Collection Clearance Officer, by email at Info_Coll@fws.gov, or by
telephone at (703) 358-2503. Individuals who are hearing or speech
impaired may call the Federal Relay Service at 1-800-877-8339 for TTY
assistance.

SUPPLEMENTARY INFORMATION: In accordance with the PRA and its
implementing regulations at 5 CFR 1320.8(d)(1), all information
collections require approval under the PRA. We may not conduct or
sponsor and you are not required to respond to a collection of
information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent
burdens, we invite the public and other Federal agencies to comment on
new, proposed, revised, and continuing collections of information. This
helps us assess the impact of our information collection requirements

and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment--including your personal identifying information--may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The information collected for the National Survey of Fishing, Hunting and Wildlife-Associated Recreation (FHWAR) assists the Fish and Wildlife Service in administering the Wildlife and Sport Fish Restoration grant programs. The 2022 FHWAR survey will provide up-to-date information on the uses and demands for wildlife-related recreation resources and a basis for developing and evaluating programs and projects to meet existing and future needs.

We collect the information in conjunction with carrying out our responsibilities under the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777-777m) and the Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669-669i). Under these acts, as amended, we provide approximately \$1 billion in grants annually to States for projects that support sport fish and wildlife management and restoration, including:

- Improvement of fish and wildlife habitats,
- Fishing and boating access,
- Fish stocking, and
- Hunting and fishing opportunities.

We also provide grants for aquatic education and hunter education, maintenance of completed projects, and research into problems affecting fish and wildlife resources. These projects help to ensure that the American people have adequate opportunities for fish and wildlife recreation. We conduct the survey about every 5 years. The 2022 FHWAR survey will be the 14th conducted since 1955. We sponsor the survey at the States' request, which is made through the Association of Fish and Wildlife Agencies. We contract with the National Opinion Research Center (NORC) at the University of Chicago, which collects the information using internet, telephone, or mail-in interviews.

Respondents are invited to take the survey with a mailed letter. NORC will select a sample of sportspersons and wildlife watchers from a household screen and conduct three detailed interviews during the survey year. The survey collects information on the number of days of participation, species of animals sought, and expenditures for trips and equipment. Information on the characteristics of participants includes age, income, sex, education, race, and State of residence.

Federal and State agencies use information from the survey to make policy decisions related to fish and wildlife restoration and management. Participation patterns and trend information help identify present and future needs and demands. Land management agencies use the data on expenditures and participation to assess the value of wildlife-related recreational uses of natural resources. Wildlife-related recreation expenditure information is used to estimate the impact on the economy and to support the dedication of tax revenues for fish and wildlife restoration programs.

Title of Collection: National Survey of Fishing, Hunting, and Wildlife-Associated Recreation (FHWAR).

OMB Control Number: 1018-0088.

Form Number: None.

Type of Review: Reinstatement of a previously approved collection.

Respondents/Affected Public: Individuals/households.

[[Page 28973]]

Respondent's Obligation: Voluntary.

Frequency of Collection: Screener data collection will be conducted from January through March 2022. The first detailed sportsperson and wildlife-watcher interviews will be conducted in May 2022. The second detailed interviews will be conducted in September 2022. The third and final detailed interviews will be conducted in January 2023.

Total Estimated Annual Nonhour Burden Cost: None.
