

## Email Request for EMR Survey:

Dear all,

As part of the NCORP Annual Meeting, specifically during the NCORP Administrator Session, we will have a session topic focusing on the use of electronic medical records (EMR) in clinical research activities. To prepare for this session we would like to gather more information on the current use of EMRs for these activities within the NCORP network. We will compare the responses of this survey to the results of a similar survey conducted in March 2014.

The survey can be retrieved at [\[link provide\]](#). We would like for each NCORP site/institution that utilizes EMR to complete the survey, so we are requesting you either forward this message to each of your applicable sites as soon as possible or complete the survey centrally for each of your sites based on information they provide to you. If completed centrally you will be able to access the survey multiple times and enter a new site/institution name. Please complete the survey by COB [\[date to be determined\]](#) so we will have sufficient time to analyze the results for presentation on August 25<sup>th</sup>.

Thank you in advance for your assistance and willingness to share this important information! Should you have any questions please let me know.

Marge
