PART I.—GENERAL INFORMATION

Background.-- This proceeding was instituted in response to petitions filed on September 29, 2021, by the Coalition of Freight Coupler Producers. The Coalition is comprised of Amsted Rail Company, Inc., Chicago, IL and McConway & Torley LLC, Pittsburgh, PA. Countervailing and antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and dumping. Questionnaires and other information pertinent to this proceeding are available at https://www.usitc.gov/investigations/701731/2021/freight_rail_coupler_systems_and_components_chi/na/preliminary.htm

FRC covered by these investigations are certain freight rail car coupler systems and components thereof. Subject freight rail car coupler systems are composed of knuckles, coupler bodies, coupler yokes, and follower blocks. Subject coupler systems and components are included within the scope whether finished or unfinished, whether assembled fully or partially or unassembled, whether mounted or unmounted, or if joined with nonsubject merchandise, such as other non-subject system parts or a completed rail car. Only the subject coupler system and components are subject to duties if imported with or mounted with other nonsubject merchandise. Subject freight rail coupler components imported individually independent from a coupler system are also included within the scope of the investigations.

A coupler system (also known as a "coupling") is the mechanism used to connect freight rail cars together. The knuckles function as interlocking parts of the couplers that close automatically due to the force of the freight rail cars coming together. The coupler yoke functions as the pocket for the draft gear that connect couplers to the freight car. The follower block is a rectangularly shaped block of steel that is interposed between the back end of the coupler and the front working end of the draft gear.

The products covered by the scope of these investigations, when imported into the United States, meet, intend to meet, or exceed the Association of American Railroads ("AAR") specifications of M211, "Foundry and Product Approval Requirements for the Manufacture of Couplers, Coupler Yokes, Knuckles, Follower Blocks, and Coupler Parts" and/or AAR M215 "Coupling Systems," or other equivalent domestic or international standards (including any revisions to the standard(s)). Subject merchandise include: (1) E and E/F couplers; (2) F couplers; (3) E yokes; (4) F yokes; (5) E and F knuckles; and (6) and E and F type follower blocks. The inclusion, attachment, joining, or assembly of non-subject components with subject components or systems does not remove the subject components or systems from the scope.

For purposes of this investigation, the country of origin for subject coupler systems and components, whether fully assembled, unfinished, semi-finished, or finished, or attached to a rail car, is the country where the subject coupler components were cast and/or forged. Subject merchandise includes coupler components as defined above that have been further processed or further assembled, creating a more complex assembly in a third country, including those coupler components attached to a rail car in third countries. Only the value of the subject merchandise if entered attached to other non-subject products including the rail car will be subject to duties.

FRC are currently imported under subheading 8607.30.10 of the Harmonized Tariff Schedule of the United States (HTSUS). When presented to U.S. Customs and Border Protection attached to finished rail cars, subject merchandise may also be imported under HTSUS heading 8606, and the duty rates provided in heading 9803.00 may be claimed if such rail cars are imported as an Instrument of International Traffic. The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals. In addition, if your firm is a U.S. producer, the information you provide on your production and imports of FRC and your responses to the questions in Part I of the producer questionnaire will be provided to the U.S. Department of Commerce, upon its request, for use in connection with (and only in connection with) its requirement pursuant to section 702(c)(4)/732(c)(4) of the Act (19 U.S.C. § 1671a(c)(4)/1673a(c)(4)) to make a determination concerning the extent of industry support for the petition requesting this proceeding. Any information provided to Commerce will be transmitted under the confidentiality and release guidelines set forth above. Your response to these questions constitutes your consent that such information be provided to Commerce under the conditions described above.

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is optional. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

Note.--If your firm does not produce any out-of-scope merchandise on the same machinery and equipment as scope merchandise then the "overall production capacity" numbers reported in this question should be exactly equal to the "average production capacity" numbers reported in question II-7. If, however, your firm does produce out-of-scope merchandise using the same machinery and equipment as scope merchandise, then the "average production capacity" reported in question II-7 should exclude the portion of "overall production capacity" that was used to produce this out-of-scope merchandise.

"Production" – All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

- II-10. **Employment data.**--Report your firm's employment-related data related to the production of FRC and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to June periods, calculate similarly and divide by 6.

If your firm had the same number of PRWs in all calendar year and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3)."

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid"—Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

- II-12. **Purchases.**--Has your firm purchased FRC produced in the United States or in other countries since January 1, 2018? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire.)
