ATTN: Dawn Wolfgang

We have received information from our partners that you are making changes to the 5300 Call Report Form and Account Codes. Could you please tell me if these are “proposed” changes or if they are required changes for March 31, 2022 reporting?? The Account Catalog attachment that we received does say “Proposed”, but I don’t see that word on any of the other documents. Please respond to let me know whether this is only “Proposed” or whether it is implemented for March 31, 2022.

Please note: This will require a major effort, with a time estimate of over 80 hours of programming, with additional testing time required. The programming and testing time allotted for 5300 Reporting each quarter has been limited to only 16 hours for both programming and testing in the past. To require the added time would take those programmers and testers away from any other assignments they are working on. Something this big should NOT be scheduled only one quarter away, and would be better with direction provided 4 quarters prior to actual implementation.
