## General Comment

CDR does NOT take one hour. A disabled person already has a lot going on in their lives and it is extremely stressful to shift to trying to fill out CDR and the questions are weird and confusing. It took me DAYS to finish it, then SSA did not fix their "system" for MONTHS. A medical record should be enough. Even if a disabled person works part-time, or tries to get some education to put themselves in a better place financially to survive. it is extremely difficult to just do that on TOP of having to do CDR that takes hours/days, hurting our chance to make it in the world. I know because it always happens to me. It is also next to impossible to find help. It is also extremely stressful calling SSA office because it's only open when I have class or lab research time. When I do call, I wait hours, taking my time away from what I need to do to make it in my class as a person with functional limitations. I also can't even go to the SSA office (which is also stressful by itself) to properly document that I have been going to the office due to scheduling difficulties and now COVID for help and clarification.
