General Comment

i do not think this report should come from the cdc, where fauci runs it crazily and without any merit the cdc is worth a grade of f minus. it does not do its work well at all. this job of collecting violence figures should come from the police. the police morgue is involved and they can keep the numbers better. take this collection of information from the cdc, which does not do any job well. this collection of information should never be done by the cdc ever.
