i think people have no idea that a third party can go into you irs, banks and even your daily life, without any notification!!! It's so awful to do to AMERICAN PEOPLE...we all having a right to know when the government is stalking us. This is my daughter's cell she's not 18 yet. information and choices is what america was built on. So it might go over better if you told the people you choose that you're going to be a watch dog. I was extremely upset and then very angry. When I was trying reading all the stuff y'all do. I'm sure I don't get 10% of the real reasons. I understand there are tons of scammers faking work injuries stealing benefits and that cost everyone. But it seems like those people get away with it. the single mothers trying to do the right thing get stalked. i lost my lively hood, fought just to get surgeries and left permanent damages because big companies would rather spend money on lawyers to fight worker's compensation for 2 years? Crazy i just wanted my arm fixed and to go back to a job i truly loved.! being inside 4 years losing everything has destroyed me. high blood pressure cholesterol and mentally at my lowest. A disappointment to my family daughter and especially myself. NO Car food stamps housing no friends depression anxiety and was suicidal more than once. i wish people could just look at people, no rich vs poor, black /white/ brown, tall or short, gay or straight? baptist, catholic, non believers who cares. We worry about everyone else and don't think they are good people we always judge assuming the worst. Looking through computer/ cellphones is causing the world is desensitized to life and each other. i don't know why I am picked for this. i don't even have a cell phone?! Poor people would love to pay all of their bills, unfortunately survival is a must. Life is always something unexpected and if you don't even get the basics you definitely not going to be ahead with saving and college for kids, and no retirement anymore. I thought putting myself through nursing school would enable me to take care of my daughter providing with never needing a hand out. I wanted to show her she can do anything she wants and be proud. I never expected to go in a hurricane to move a tree limb and break my arm in 50 mph winds?!? I never expected that would end my job, my pride, happiness and end up with permanent life long damage and no hope left.
