General Comment

this aency deserves an f minus grade for its lousy work. its work in this national pandemic has been among the most inaccurate of all time. you have done nothing to get honest, decent accurate statistics of this national pandemic. you have failed miserably in having accurate statistics. for example waiting 14 days after vaccine to consider a person vaccinated and if they get sick before that it is not counted as a vaccine sickness. what is wrong with you. except it must be corruption? or is it stupidity? but the entire project of keeping health statistics in this pandemic was among the missing at this miserable agency that i don't think can count straight. this agency has been a miserable disappointment for america. the work was that of a third world country. lousy lousy work
