Subject: public comment on federal register

the information you are getting is crooked since you collect it from the guys making the money from what they tell you. this is crooked collection of information. start going out and checking factually what is on their boats, after they give you the piece of paper on what they collected. it is time to make the commercial fish profiteers tell the truth. it has been nothing but lies from them for years. why spend tax dollars collecting lies? these are my comments for the public record. this industry is as bad as the wall street masters of the universe - just as crooked and stealing from the public good.
