General Comment

no animal testing should be utilized for this sars which was developed by a lab in wuhan china after fauci sent our american tax dollars to eco health and eco health sent it to wuhan. we would not have this pandemic if fauci had not authorized payment of these US tax dollars. this is misuse of american tax dollars imo. animal testing was used in 1500 A.D. and this is 2021 and it is not an accurate method at all. animals suffer in horrific labs and are not fed and killed at the end. use human cells and humans which are more accurate stop misusing and abusing animals. this agency caused the murder of millions of animals every single year. not all of the experiments are done in America. they send our tax dollars out of America to do the testing of these animals in other countries. they try to keep it secret but it is animal murder for no good cause except to pay off their pals who have cushy jobs murdering animals. it is ugly and needs to be shut down totally.
