

## OASIS C QUESTIONS

M1000 Inpatient facilities Why is response 3 hospital emergency department included as an option when question is for inpatient facilities?

M1020, diagnoses

1022,1024 V-Codes currently are given severity/symptom control rating. Since V-Codes include wound complications, aftercare, etc., why wouldn't MO1024 include symptom control ratings?

M1307 stage II pressure ulcer UK = Present at last SOC/ROC

NA = No new since last SOC/ROC

Aren't these both saying patient with unhealed stage II that was present at most recent SOC/ROC, but none new since last SOC/ROC?

M2030 injectable medications Suggest in question include wording injectables taken "in the home" due to recent change in these guidelines?

Where do we address if patient having difficulty with inhalers/oxygen?

M1350 skin lesion or open wound Suggest change "above" to "pressure, stasis or surgical wounds."

MO100 Start/resumption of care – suggest add option SOC – no further visits planned and ROC – no further visits planned.

M1820 ability to dress lower body – Suggest include "prosthetics and orthotics" to wording.

M1850 transferring – suggest change to "rise to stand/return to sit on a variety of surfaces."

Timing of effective date of January 1, 2010 is problematic due to staffing and holidays.
