this agency is totally into being regulatorily captured by profiteers to the complete and total detriment of most animals in the usa. this agency doesnt care for the puppies being abused in puppy mills, it has allowed cwd to go from being just in fort collins colorado sto spread to 28 or more states in the usa, it has allowed cyanide to be placed in sites unknown to innocent citizens so that their dogs die from cyanide and their kids almost die from it too. this agency is notoriousoy absenton the job. they get their paycheck but they dont work a full week and certainly dont do a thing to protect any animal around. what they exist to do is to coddle profiteers at animal abuse. and they work for agribusiness and its dirty use of pollutant toxic chemnicals that are killing all of us. the sordid history of this agency and its killing of several million wildlife species every single year in the usa is part of its history and present day set of facts. it needs to be shut down and re organized to protect wildife from the sordid human beings who will kill any of them in the word way possible to make a buck. the mink farms that are known to have covid are being allowed to operate in this country by this agency despite pleas to shut them down as mink are known to be capable of catching covid. there is no reason to allow them to operated. the puppy mills that abuse the puppies so they go blind and have wounds that are gaping are left to operate by this sordid agency. this nasty, disgusting agency. it is time to take funds from this agency and get a new set of people in there to do right and be honest instead of corrupt to the core. this comment is for the public record. please receipt. jean publiee [jeanpublic1@yahoo.com](mailto:jeanpublic1@yahoo.com)

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2021-0056]

Notice of Request for Revision to and Extension of Approval of an  
Information Collection; Animal Disease Traceability

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information  
collection; comment request.

-----  
SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this  
notice announces the Animal and Plant Health Inspection Service's  
intention to request a revision to and extension of approval of an  
information collection associated with animal disease traceability.

DATES: We will consider all comments that we receive on or before  
December 20, 2021.

ADDRESSES: You may submit comments by either of the following methods:

Federal eRulemaking Portal: Go to [www.regulations.gov](http://www.regulations.gov).  
Enter APHIS-2021-0056 in the Search field. Select the Documents tab,  
then select the Comment button in the list of documents.

Postal Mail/Commercial Delivery: Send your comment to  
Docket No. APHIS-2021-0056, Regulatory Analysis and Development, PPD,  
APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-  
1238.

Supporting documents and any comments we receive on this docket may  
be viewed at [regulations.gov](http://regulations.gov) or in our reading room, which is located  
in Room 1620 of the USDA South Building, 14th Street and Independence  
Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30  
p.m., Monday through Friday, except holidays. To be sure someone is  
there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on animal disease  
traceability, contact Dr. Alexander K. Turner, Assistant Director,  
Animal Disease Traceability and Veterinary Accreditation, Strategy and  
Policy, VS, APHIS, 2150 Centre Ave., Building B, Fort Collins, CO  
80526; (970) 494-7353. For more information on the information  
collection reporting process, contact Mr. Joseph Moxey, APHIS'  
Paperwork Reduction Act Coordinator, at (301) 851-2483;  
[joseph.moxey@usda.gov](mailto:joseph.moxey@usda.gov).

SUPPLEMENTARY INFORMATION:

Title: Animal Disease Traceability.

OMB Control Number: 0579-0327.

Type of Request: Revision to and extension of approval of an  
information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 et  
seq.), the Animal and Plant Health Inspection Service (APHIS) of the  
U.S. Department of Agriculture is authorized, among other things, to  
prevent the introduction into and the dissemination within the United  
States of any pest or disease of livestock or poultry.

Within APHIS, Veterinary Services safeguards U.S. animal health  
through a variety of activities, including disease control. One  
important part of disease control is animal disease traceability.  
Animal disease traceability provides the ability to document the  
movement history of an animal throughout its life. Knowing where  
diseased and at-risk animals have been and are located, as well as when

they have been there, is indispensable during an emergency response and important for ongoing disease programs.

Epidemiologists use this information to determine the potential spread of a disease. In fact, having the ability to plot locations within a radius of an infected premises helps to determine the potential magnitude of a contagious disease and the resources needed to contain it. Furthermore, as diseases are controlled or eradicated, it is important to document areas, States, or regions of the country that are free from disease. Traceability helps APHIS determine those disease-free zones, thus enhancing the marketability of U.S. livestock.

The regulations for animal disease traceability are located in 9 CFR part 86. Under the regulations, unless specifically exempted, livestock moved interstate must be officially identified and accompanied by an interstate certificate of veterinary inspection. The regulations specify approved forms of official identification for each species but allow livestock to be moved between any two States or Tribes with another form of identification as agreed upon by animal health officials in the two jurisdictions. This identification requirement improves APHIS' ability to trace livestock if a disease is detected. Development and implementation of the animal disease traceability framework continues to be a partnership involving APHIS, States, Tribes, and industry. In fact, States and Tribes enter into cooperative agreements with APHIS to implement their traceability activities.

Other activities in this information collection include official identification device (ID) distribution; administration of official ID devices; approval of official ID devices; premises ID registration; official ID applications; applications for and approval of approved tagging sites; interstate certificate of veterinary inspection; cooperative agreement quarterly reports; cooperative agreement road maps and submission for approval; and Tribal tag distribution.

We are asking the Office of Management and Budget (OMB) to approve these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.613 hours per response.

Respondents: State, Tribal, and territorial animal health officials; accredited veterinarians; breed and registry associations; producers; livestock market operators; and harvest facility employees.

Estimated annual number of respondents: 273,587.

Estimated annual number of responses per respondent: 9.

Estimated annual number of responses: 2,475,812.

Estimated total annual burden on respondents: 1,518,459 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 14th day of October 2021.  
Mark Davidson,  
Acting Administrator, Animal and Plant Health Inspection Service.
