Subject: SAVE THE DATE for Workshop: Can nutrition modify the impact of environmental exposures on autism spectrum disorder?

Location: Registration site and link coming soon/Virtual Meeting

Tuesday, 6/21/2022 11 – 5 pm

Wednesday, 6/22/2022 11 – 5 pm

Dear All,

Please save the date for this exciting DERT-led workshop in June! Stay tuned for more information to come.

The purpose of this meeting is to focus on the possible role of maternal diet and nutrition in mitigating the effects of environmental risks relevant to neurodevelopmental disorders like autism spectrum disorder (ASD). The workshop will bring together environmental health scientists and nutrition researchers to cover a variety of topics, including mechanisms linking maternal nutrition and neurodevelopment, modifiers of environmental exposure, and methods for studying complex nutrient effects. Identifying mitigating influences of maternal diet and nutrition on ASD risk associated with other co-occurring environmental exposures could lead to important public health benefits. In cases where environmental exposures (e.g., air pollution) linked to ASD risk are difficult to reduce or prevent, targeted nutritional interventions may offer some protection against unavoidable chemical exposures.

REGISTRATION SITE and DRAFT AGENDA will be available soon.

Thank you.
