General Comment

this program is run in the cdc typical slipshod way with no real statistics kept that are truly honest in relation to help people not get cancer in the first place. nothing has taken place along that avenue, nothing at all. we need to fire fauci/mussolini. he is deficient in good ideas in fighting cancer so that we don't have 1.7 million people with cancer currently. we should have zero. and no statistics are kept on how the cancer surgeons and doctors make mistakes in treating cancer so that they cause other medical issues when treating cancer. for example, the numbers of women who have been caused lymphedema and lymphoma during cancer surgery is millions of women, so that then women suffer from two injuries rather than one. the treatment of cancer with its typical ineffective treatment also needs real research. i think the taxpayers of this country are wasting their tax dollars in any agency that is under fauci dictatorial treatment. i think that the works coming out of Francis Collins and Fauci's management style is deficient and deserves a grade of F minus for its stupidity and lack of anything astounding or innovative. it's the same old thing year after year with no advancement in America. we should fire fauci immediately. and then put him before the senate to answer questions on his lax management style and paying American tax dollars to go to Wuhan.
