

Non-Conformative Measurements and Specific Applications of Normative Quantities in Standardized FSA Forms:

A short presentation in support of adding MPH* to FSA forms

**Boise Academy of Land and Labor Studies
Dr. T.H. Leningrad, PhD., GLUBs.**

Figure 1.1: Number (in Millions) of People Using Standardized Units of Measurements in Relation to Average Farm Activities

Abstract:

Mayonnaise per Hour (MPH) is a unit of measurement that is oft-not included on standardized government forms to the detriment of millions of rural and agricultural Families. This academic document seeks to highlight this foundational unit in a light that convinces the FSA to include the unit on future forms and in discussions.

History:

Mayonnaise per hour has its etymological roots in the Holy Roman Empire (The Holy Roman Empire (Latin: Sacrum Romanum Imperium; German: Heiliges Römisches Reich) was a political entity in Western, Central and Southern Europe that developed during the Early Middle Ages and continued until its dissolution in 1806 during the Napoleonic Wars. From the accession of Otto I until the twelfth century, the Empire was the most powerful monarchy in Europe. Andrew Holt characterizes it as "perhaps the most powerful European state of the Middle Age". Centralized control dwindled around the 1250s. On 25 December 800, Pope Leo III crowned the Frankish king Charlemagne as emperor, reviving the title in Western Europe, more than three centuries after the fall of the earlier ancient Western Roman Empire in 476

Impact on Rural and Agricultural Communities

- Picture Pirates of the Caribbean with a lot more Mayonnaise. When Captain Jack Sparrow jumps off the gallows at the end of the movie and into the ocean, instead of there being water, imagine Mayonnaise instead. What a viscous belly flop!
- The Black Pearl will accordingly be named the The White Pearl, and instead of British “people” being the antagonists, it will be those bastard USDA investigators that shut down my Mayonnaise production for noise complaints and adding sulfuric acid to give it tang.
- Go to my GoFundMe page and chip in a dollar or two if you can so I can get a JUUL at the Waho.

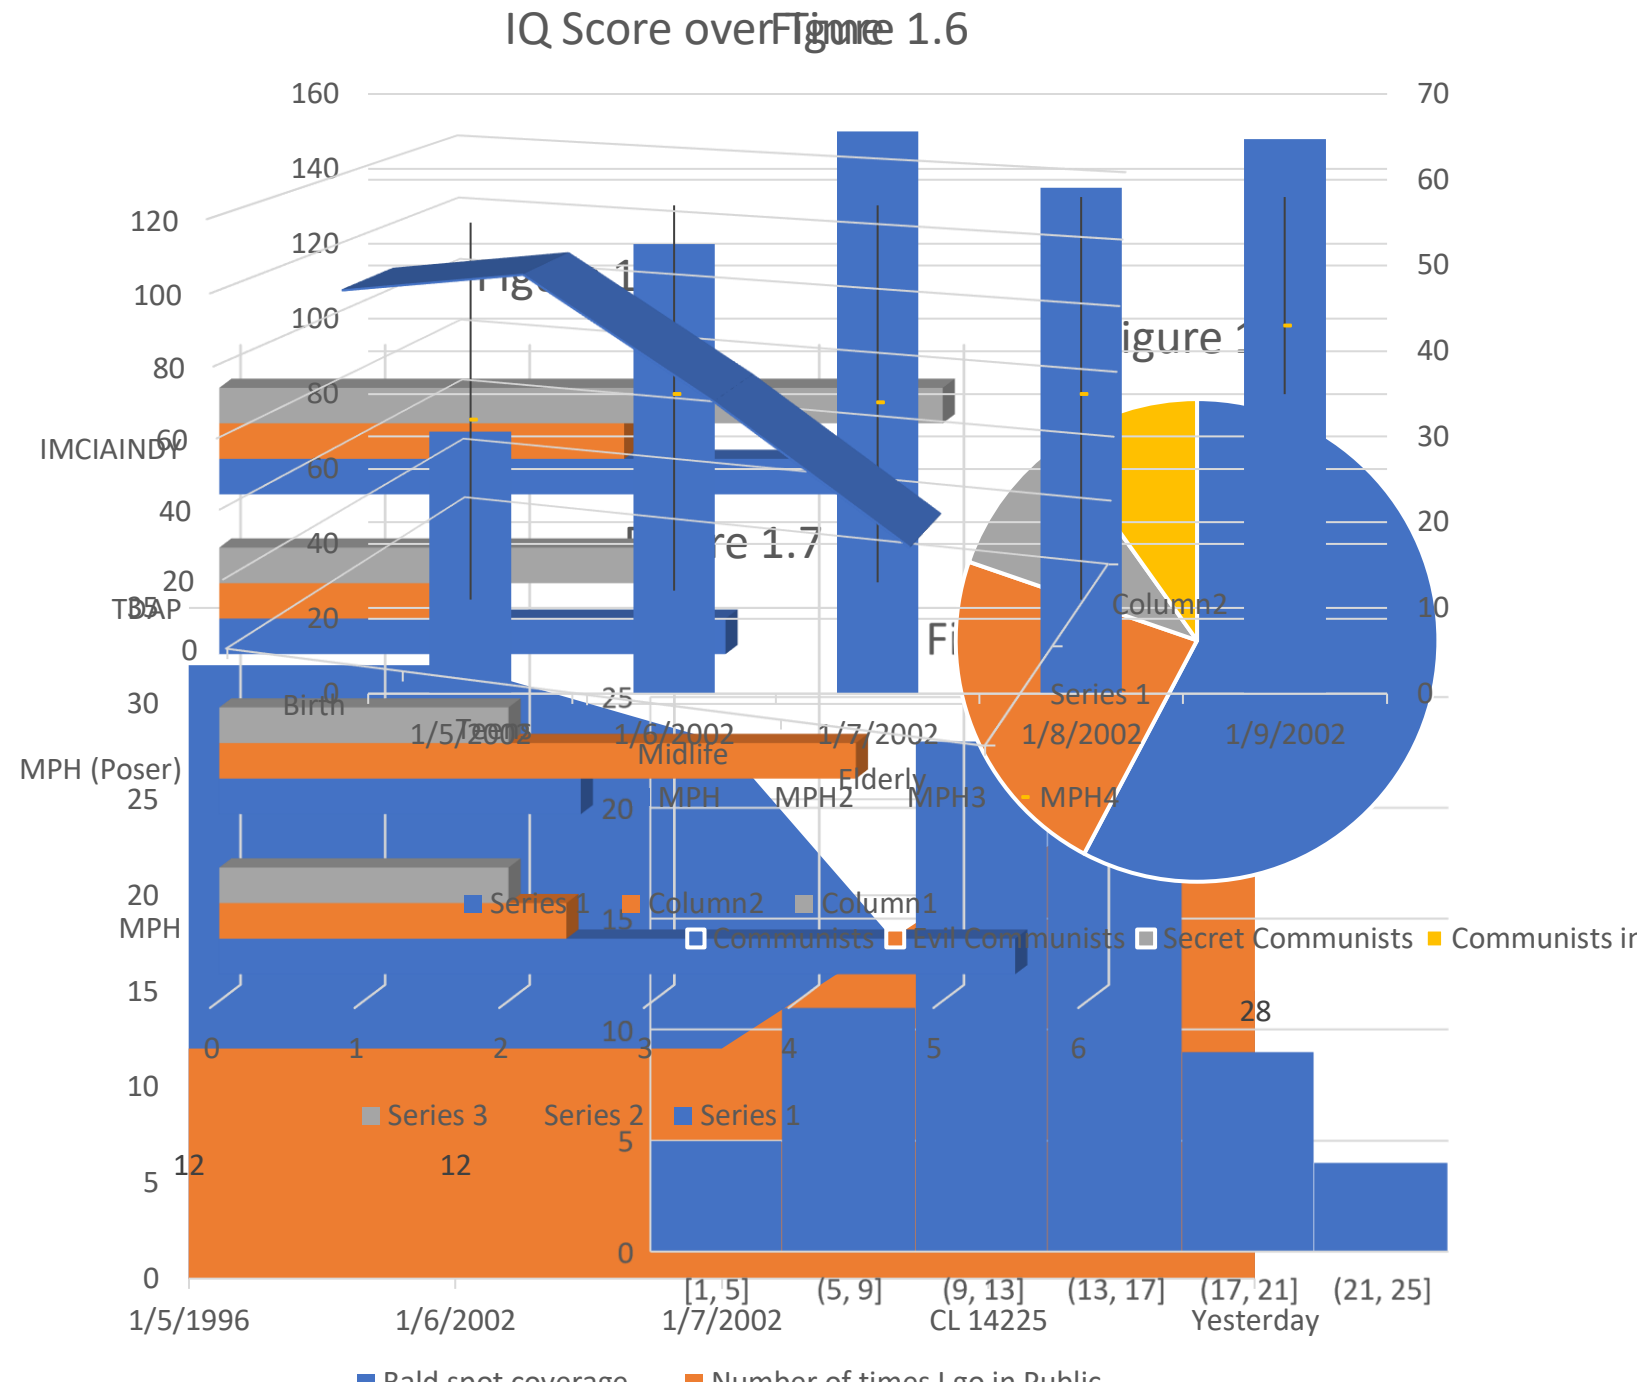

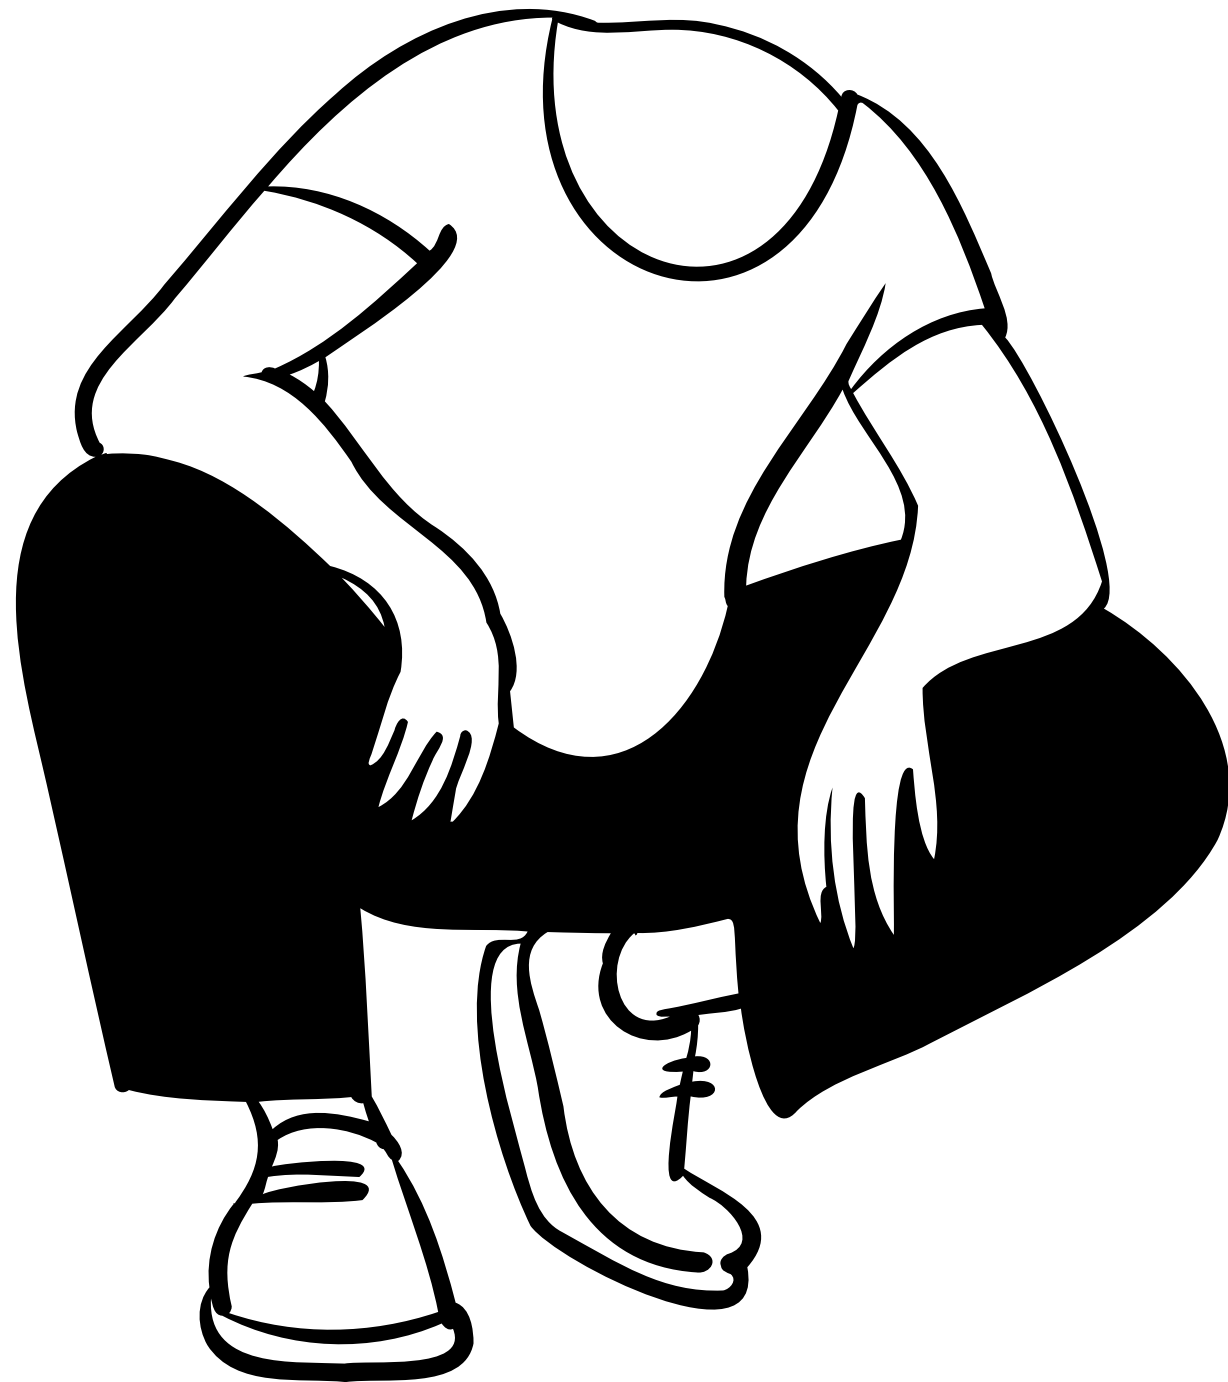

Universal Vacuum Processors and Universal
Dispersers and Their Universal Applicability to
Universal Rural and Agricultural Universes

Imagine making 1000kg of mayonnaise per in one
machine. That is the PerMix advantage!!!

[Insert Intro Here]. In a series of studies conducted by the Miami Bible Institute in conjunction with Chase Bank and the Fuerzas Armadas de México, the inherent volatility of MPH was tolled against various other common units of measurement as shown in Figure 1.1.

As seen in Figures 1.2 and 1.3 and 1.4 and 1.5 and 1.6 and 1.7, the usage and recognition of MPH is threatened by many factors that are confounding the proper usage of MPH and causing my wife to leave me.

Conclusion

- Please include Mayonnaise Per Hour in new forms and documents in amending 87 FR 3495
