## Submitter Information

**Name:** Sally Chiappone

**Address:** United States,

---

## General Comment

it is the consumer as well as the small farmer and rancher who will bear the burden for the high costs of NAIS. Because of the costs and government intrusion of NAIS, future farmers will choose not to go into farming, while current producers will decide not to stay in farming. This will result in less competition, greater reliance on foreign imports and poor quality at higher prices. The NAIS will heavily burden small, organic, and sustainable farmers, which will hurt efforts to develop safer, decentralized, local food systems. As evidenced in the recent peanut butter recalls, having a centralized food processing and distribution system means that contamination in even one plant can lead to deaths and illnesses of thousands all over the country, and create problems very difficult to track and isolate.
