General Comment

i dont trust this agency to do honest work in relation to post acute care when so many old people died in these nursing homes. i think this study is in fact a cover up. the entire study will try to coverup the horror that was done to old people in care homes. this agency shoudl have been responsible fro sstopping governors from putting sick virus people into care homes causing the virus to kill the entire populagtion of these homes. this agency is behind a sordid policy of not taking adequate care of old people. this agency is now trying to make some americans into untouchables because they are not vaxxed. i find these influences on america to be negative i do not think this agencyh is responsible for any good health in america at all. i think they are purveyors of american doom. this agency gets trillions of dollars and our lives are shorter every year in america. the work being done by this agency sucks.,this agency deserves a grade of f minus for its work. the entire agency with its far too friendlhy collaboration with felonious drug companies shows a depressing attractoin to criminality imo. this agency shoudl be shut down. it has become felonious itself. this proejct sucks. no taxpayer dollars should be used for htis project.
