General Comment

Regarding document CMS-2022-0072-0001,
Utilizing and implementing an electronic document for all 51 state Medicaid agencies is an effective strategy to increase compliance and quickly improve care. Evidence-based research as we know takes years before it is shared and years after that to create a sustainable change that is proven to be needed. An electronic form that is editable will quickly allow agencies to be in compliance.
The use of electronic forms that are available to all agencies also allows for transparency. The ability to monitor and review forms submitted will increase communication and collaboration between all 51 agencies.

Thank you,
Randilyn Lewis, MSN RNC
