Accelerating Precision Environmental Health: Demonstrating the Value of the Exposome

Dear colleagues,

Please join us at this pivotal moment as we shift from defining the exposome to *doing it*. We will shape the future of exposomics at the intersection of environment and health/disease research. You've received this invitation because you have something to add in demonstrating the value of the exposome!

Save the Dates (11am-4pm ET) and [Join Our LinkedIn Group](#) where information about registration will follow:

July 22 Tools, Technologies, and Methodologies (measuring the exposome)

August 5 Biological Responses and Impact on Health and Disease (integrating multi-omics with biomarkers of exposure, response, effect, susceptibility, vulnerability, and resilience)

August 12 Future of Clinical and Prevention Trials, Cohorts and Epidemiology (designing studies, calculating power, approaching pooling)

August 19 Social and Societal Impacts (integrating social determinants of health, diversity, health disparities, privacy, trust, etc...)

August 26 Data Infrastructure, and Data Analytics (sharing data and harmonizing it; analyzing, interpreting, visualizing, and modeling data)

August 31 Integration, Prioritization and Collaboration (across all five themes)
Wednesday, 11am-1pm ET

In each of the first five virtual workshops you'll add all the necessary detail. During a sixth, and last, virtual session, you'll help sort out priorities for moving forward with individual and collaborative efforts. You will create our working agenda. Anything you care about can be considered and advanced.

You will direct your own involvement and be able to
your own learning and contribution. You will be able to

maximize
connect

personally and practically with everyone else who joins and receive copies of all the notes from all our many working, breakout conversations.

What is your passion in all of this? What is your strategic imperative? What is your learning and contribution? These are the things we invite you to begin thinking and talking about with colleagues. Join our Exposomics LinkedIn Group for more information including on how to register when available.

Sincerely,

Organizing Committee
